## PREFACE.

The music contained in the first part of the *CANTICA LAUDIS* has been selected and arranged with reference to *choir performance*, and is designed to furnish *choirs* with tunes, which, in their proper interpretation, shall be well adapted to the devotional end which should ever be kept in view in all church music, and which shall, at the same time, musically considered, take a high stand, as tasteful, elegant and scientific. Where shall we look for such tunes? or from whence shall they be obtained? Shall we attempt to originate them, or to draw them from our own imaginative powers? The idea is preposterous. The *original tunes*, so called, with which the pages of some modern collections are filled, (and their name is legion,) can only be explained on the ground of a deplorable state of musical taste and knowledge, or of egotistic vanity and ignorance.\* We have seen so many (to us) unmeaning and silly tunes called *original*, and we have especially been so much dissatisfied with our own attempts in this way, that we have not often made the effort to originate forms of song, with which to fill the pages of this work; but we have rather preferred to go directly to the great fountains of true excellence, the only *human* sources of truth and beauty in melody and in harmony; and to take our subjects, and their development or treatment, too, so far as our metrically hymnodic purpose would allow, from the productions of those wonderful geniuses who have filled the world with their praise. We may, therefore, congratulate our readers, that in the use of this book they will not be cloyed with the frequent recurrence of "L. M.'s" and "G. J. W.'s," on almost every page; but that they will be permitted to hold musical intercourse with the Handels, the Mozarts, and the Beethovens, both of olden and of more modern times.

But while there are comparatively but few tunes in this work which can be said to be *original* with the editors, there is a sense in which they may be said to have composed almost all of them; and that is the Latin sense of the word *Compose*, to *put together*. The tunes frequently found in church music-books, attributed to the great musicians, as Handel, Haydn, Mozart, Beethoven, and others, were not, *as tunes*, composed by those whose names they bear, for these authors did not compose psalm and hymn tunes; but, in almost all cases where names of this class of writers are found attached to tunes, the fact is, that the leading subject, or principal musical idea, has been selected from some of

their productions, and has been worked out, composed, or *put together in a tune form*, by other and inferior hands. Hence it is that these authors are so often repudiated in their own works, or unsouled in the very breathings of their own immortal spirits; for it is not an uncommon thing for an editor who attempts to arrange from Beethoven, for example, but who does not comprehend his author, or enter fully into his spirit, to divest the piece of all that is peculiar to the great master, or that marks his genius, and leave nothing but the more common-place phrases, found alike in the productions of the little and the great. So, also, we have seen pieces, bearing the name of Mendelssohn, so vitiated, by *arrangement*, as to leave not a vestige of Mendelssohnianism. Alas, for Mendelssohn's or Beethoven's pieces, when deprived of all that is Mendelssohnian or Beethovenish!

There are those who object to all attempts at arrangements from the works of the great composers. "Perform these works," say they, "as they were originally written, or else do not perform them at all; and if new tunes are wanted, why, make them." But this principle, carried out, would not only strike out of existence many of the most beautiful tune-forms now popular and useful, but it would cut off entirely from the mass of the people all opportunity of deriving pleasure or improvement from the works under consideration, and would keep down the public taste, by confining it to the productions of common-place writers. Besides, the means for performing these works, whether vocal or instrumental, do not exist, except in a few of the larger cities; nor do the pieces themselves exist in a form adapted to the purposes of ordinary public worship. Now, if it is through these works alone that musical taste is to be advanced, (and we know not where else to look for the means of improvement,) and if church music is to be elevated, and the results of the most successful efforts of human genius and scientific research be made subservient to the worship of God, we are absolutely driven to the great authors; they are our only resource; and since they have left little or nothing in a form adapted to our purpose, or to the prevailing habits or customs in church music, the successful editor must bring his musical sensibilities and perceptions into a close intimacy with the forms of truth and beauty which they have developed, and, imbuing his very soul in them, must work out, in close adherence to his matchless models, tunes suited to his purpose.

That this is a work most difficult, we know and deeply feel; that it may be presumptuous in us to aspire to its most successful accomplishment, we do not deny; and yet, it is the very thing we have, in a humble manner, attempted to do. With what success, our readers must judge.

To find the materials for the following pieces, we have gone through with an extensive course of musical reading, and have examined, with some diligence and attention, the works of many of the best writers. We have selected not a few of the gems scattered in rich profusion through their pages, and have endeavored to present them in a form

\* Let it not be said that we are opposed to original tunes, or that we would discourage native talent or genius; far otherwise is the fact. But yet, we cannot, in good taste, or in good conscience, encourage an attempt at musical composition, where there seem to be no indications of genius, or in connection with manifest musical ignorance, or the neglect of general cultivation. Both genius and mental and musical discipline are necessary to enable one to compose well, in the ordinary sense of the term. Wherever, therefore, there is talent, we would urge musical study, and also that previous mental discipline without which mere musical study can never attain any very high point of excellence; and especially would we insist upon the thorough reading and study of classic authors, before any one shall attempt to draw upon his own resources especially for the public edification; for the reading of Shakspeare, Milton, and the poets, is not more necessary to poetic elegance and excellence, than is the study of Handel, Mozart, and Beethoven, to taste and beauty in original musical composition.

suited to the design of our work, with as little deterioration as possible. But we do not say, that, in any one instance, our *arrangement* is as good, absolutely, as the original; we do not say, for example, that Beethoven is not always, and in every instance, better, musically or abstractly considered, than Beethoven *arranged*; but we do say that Beethoven *arranged* is vastly superior to our own productions, and to all the wishy-washy tunes of would-be composers that were ever written. We say, too, that, as a result of our labors, we are enabled to present to our readers many beautiful pieces drawn from the highest sources of musical excellence: musical thoughts, ideas, or figures, expressed in elegant melodic progressions, or in soul-stirring harmonic combinations, unheard before in this department of musical composition, and, in a tune-form, adapted to the choir service of public worship, *nowhere else to be found*.

The words "arranged from" must be taken with considerable latitude. In some instances, there is a very close adherence to the original, so near as almost to have justified the name of the author, without qualification; while in others, the departure from the author is much greater. But we believe that, in all cases, our musical readers, or such of them as are acquainted with the works from whence our tunes have been composed, will admit that we have not often misrepresented or burlesqued our authors, as has sometimes been done. The greater part of the tunes without any name affixed as author, are taken from classic writers, or have been suggested by passages from them, and have only been *composed* by the editors; many of these would fully justify the phrase "arranged from;" but, in general, where we have not pretty closely adhered to our author, we have preferred to let the tunes appear anonymous. It is proper for us also to add, *that they have been actually thus composed as tunes by the editors, for this work; that, as tunes, they are nowhere else to be found; and that they are therefore claimed as property*.

The tunes in this first part of the work, while, with but few exceptions, they are strictly choir tunes, and not adapted to congregational singing, may be divided into two classes.

I. PEOPLE'S TUNES. By this term we mean to designate tunes of flowing, agreeable melody, readily performed by a choir and understood by a congregation; unlike those that are complicated, elaborate or difficult, these tunes are easy both in the measures of rhythmic and in the intervals of melodies. This is the class of tunes best adapted to general purposes; indeed, as it is the only class that can be universally or extensively popular, so it is the most useful class for choir performance, on common occasions of public worship. The German books contain many of these popular melodies, (Volks Gesänge,) from which we have made selections in this department.\* In the selection of these tunes, however, we have always regarded it as important to avoid, First, All such as may have acquired any association unfavorable to the purposes of worship. Second, All such as are of too light and frivolous a character for religious purposes. Third, All such as approximate to the low, coarse or vulgar, alike offensive to musical taste and to

religious propriety. If we mistake not, tunes belonging to each of these classes may be found to be somewhat frequent in some recent collections of church music.

II. CLASSIC TUNES. This is, for the most part, the class of tunes derived from the works of the truly great composers, to which we have already alluded. Some of them are of simple structure and easy, (though never insignificant or silly,) and others present various degrees of difficulty in execution. It is quite impossible to present the musical thoughts of the great composers divested of all difficulties; there are difficulties of appreciation and of execution found, in a greater or less degree, in all their works. These authors have usually left upon their compositions an impress or likeness of their own musical existence. How easily can one trace Handel, in his choruses! No one of musical reading can mistake Handel for Haydn, or Haydn for Rossini. So also with Mendelssohn. Shakspeare has not more clearly stamped the poetic image of himself on his pages, than has Mendelssohn his own musical impress upon his various works. But it often happens that those peculiar traits by which Mendelssohn makes himself known are connected with some considerable degree of difficulty, and suppose in the hearer, and in the performer, a corresponding degree of musical advancement. Choirs who would improve in taste, and in style of performance, must not shrink from things which are somewhat above common-place. With regard to cultivation and improvement, there is a strong analogy between poetry and music. Milton cannot be read and understood, except by those who have made some progress in poetic taste; and Mendelssohn or Beethoven cannot be read and appreciated, except by those who have made a similar progress in musical taste. As there are those who will throw aside Milton, not being sufficiently cultivated to appreciate him, so there are those who, for a similar reason, will throw aside Mozart or Beethoven. But, notwithstanding these things, the world has decided, or rather the laws of true taste and of human improvement and cultivation have decided, that Milton is one of the greatest of the English poets; and the man who does not like him, may be sure that the fault lies in himself, or in the neglect of his own education. So, also, with Mozart and Beethoven; the laws of musical taste have made them standard authors, and the man who does not like them may, with certainty, ascribe it to his own ignorance, or want of taste or cultivation. The laws of taste as certainly exist in nature as the laws of mathematics, though they may not be so easily discoverable. As it is through the power of numbers that we arrive at true results in mathematics, so it is through the productions of true genius, or the works of the truly great writers, that we are to seek for true results in musical taste. These works form a school of taste; and it is only through a knowledge, power of appreciation, practice, and love of them, that individuals, choirs, and communities, can be in any high degree improved. This department, in this very book, therefore, so far as we have been true to our own purpose, will furnish a higher test, or standard, than is usually found in similar works, by which singers and choirs may not only try themselves, and know somewhat of their present standing, but in the proper use of which they may make sure progress in tasteful cultivation, or in the appreciation, execution and love, of musical truth and beauty.

See prefatory note to Congregational Tunes, p. 295.

\* We are not of the number, however, who suppose that because a tune is German, that it is therefore good; for there are as many poor composers in Germany as elsewhere; and some few very unmeaning tunes, marked *German*, may be found in recent American books.

## PREFATORY REMARKS.

The following exposition of the "Elements of Vocal Music," has been prepared not with reference to names, signs, or characters merely, but having also constantly and primarily in view the substance, essence, or nature of that which is to be taught. This will be observed in the propositions or axioms throughout the work. Every good teacher will endeavor to convey to the minds of his pupils, in the first place, a knowledge of things, doctrines, or facts, and afterwards, as a natural consequent, a knowledge of signs, symbols, or characters. The inversion of this order is one of the principal causes of the difficulties attending the learning of music, and of the obscurity that so often accompanies the well-meant attempts of the teacher at explanation. It is so directly at variance with the true philosophy or science of teaching that it is to be rejected by every enlightened teacher, in every department of instruction, or whatever may be the subject of his lesson. Music, the perception of which can come through the sense of hearing only, can never be taught by signs or by characters which are addressed to the eye. With as much hope of success might one attempt to teach *chiaroscuro* by verbal explanations or description, as the nature or relations of musical sounds by an exhibition of anything to the organs of vision. It is perhaps mostly to a misapprehension of this subject that we are to attribute the many new systems of notation which have appeared within a few years past; an attempt has been made to invert the order of nature in teaching music, and to communicate instruction through the eye, on the supposition that if the signs and characters are explained the things signified will be understood. Such unphilosophic attempts at teaching have of course been met by insurmountable difficulties, and these difficulties instead of being attributed to their true cause, have been supposed to arise out of a defective or obscure notation; and hence, new systems of notation (so called) have been invented. But how is it possible that one can be made to understand in any practical manner the signs or symbols of things, when as yet he has not become acquainted with the things signified or symbolized? Let *music* be taught first, and *musical signs* will follow easily enough afterwards. Let the teacher draw out and quicken the musical perceptions of his pupils, let him form in the ear a true idea of the scale, and let him train the vocal organs to the truthful production of that scale, and there will then be no great difficulty in teaching the notation by which it shall be represented. Notation consists mostly in the representation of musical sounds by means of arbitrary written characters; one arbitrary character being made, provided it be simple and easily strike the eye, is as good as another. We see then the folly and ignorance of those who would attempt to render the learning or the teaching of music easier by adopting some new system of notation. Not more absurd would be the attempt to relieve the difficulty of teaching colors to the blind, by means of a new nomenclature, than is that of rendering easier the teaching or the learning of music by a new system of notation.

It is taken for granted in the following synopsis that the teacher is familiar with his work, or that he *knows how to teach*; pedagogic directions have therefore been mostly omitted; not even the questions common in such elementary works have been inserted, on the supposition that the man who is qualified to teach will be able to ask

*his own questions.* The practical exercises too, must be regarded as specimens; for as the good teacher of arithmetic does not rely exclusively upon his text book, but often gives out original or extemporaneous questions, growing out of the immediate circumstances by which he is surrounded, so the good music teacher will write lessons *impromptu* upon the board whenever he meets his class. There is a freshness and lively interest in such lessons that cannot be reached by the most carefully prepared book-exercises. But while the manner of teaching has been supposed to be the teacher's own, the things to be taught are here stated or defined, so that this work is properly a text book for the teacher. The definitions, so often defective or false, and the technical terms, so often misapplied, in treatises of this kind, have received close attention, and it is believed, may be relied upon as accurate. The order of arrangement of topics, both in respect to analysis and synthesis, is in general such, as would naturally be suggested by a careful inductive investigation of the subject. It is, therefore, adapted to inductive teaching. It has been kept in mind however, that teachers of common singing schools have not usually time enough for a thorough course of instruction, and that they are often obliged to hurry through their work. This circumstance, and the fact too that their teaching is principally not in juvenile but in adult classes, has caused exceptions to the above principle, and modifications by which the work will be better adapted to the wants of those who think best to adopt the declarative or preceptive, in preference to, or in connection with the inductive method. Indeed we think that every good teacher of an adult singing class, will avail himself of both the inductive and preceptive forms of giving instruction, adapting himself to the various circumstances in which he may be placed.

It is not sufficient in these days that one who teaches should thoroughly understand his subject, he must also become acquainted with the art and science of teaching. Teacher's Institutes and Normal Schools are doing much to qualify common school teachers, and to raise high the standard of teaching; they are no less valuable to music teachers, and we would urgently recommend either or both of them, to all who desire to learn to teach music well, for since the great principles of teaching are the same in all branches, an attendance at the Normal School, or on the lectures and instructions of Teacher's Institutes, where methods of teaching the common school studies are constantly brought forward, explained and illustrated, cannot fail to be of the greatest benefit to the music teacher. How shall the cause of music be promoted and elevated but through the influence of the teacher of music? And how shall the teacher of music perform this work who does not constantly labor to elevate himself? And how shall he elevate himself but by constant study, and by availing himself of all the means of improvement that come within his reach?

God prosper the cause of education in general, and of musical education in particular, throughout our country and throughout the world; so that music being joined with the more common and necessary branches of knowledge, and both with revealed truth, singers, teachers, men of science, and preachers of the gospel may all unite to promote human improvement, holiness and happiness — "peace on earth and good will to men."

## INTRODUCTORY.

## ANALYSIS OF MUSICAL SOUNDS.

1. *Distinctions existing in the nature of Musical Sounds.*—A musical sound, or a TONE, may be,

1. LONG, or SHORT.
2. HIGH, or LOW.
3. SOFT, or LOUD.

2. *Properties of Tones.*—A tone has, therefore, three essential properties :

1. LENGTH.
2. PITCH.
3. POWER.

3. *Departments in the Elements of Music.*—As there are three distinctions existing in the nature of musical sounds, and as they have three essential properties, so there are three corresponding departments in the elements of music :

1. RHYTHMICS, . . . . treating of the *length* of tones.
2. MELODICS, . . . . treating of the *pitch* of tones.
3. DYNAMICS, . . . . treating of the *power* of tones.

4. *General View:—*

<i>Distinctions.</i>	<i>Properties.</i>	<i>Departments.</i>
1. LONG, or SHORT.	LENGTH.	RHYTHMICS.
2. HIGH, or LOW.	PITCH.	MELODICS.
3. SOFT, or LOUD.	POWER.	DYNAMICS.

## RHYTHMICS.\*

## CHAPTER I.

## DIVISIONS OF TIME. MEASURES. PARTS OF MEASURES. COUNTING AND BEATING TIME. ACCENT.

§ 1. The length of tones is measured by a division of time, into equal portions. This may be indicated or illustrated, by counting equally, thus : *one, two; one, two; one, two; one, two:* or thus : *la, la; la, la; la, la; la, la.*

§ 2. The portions into which time is divided are called MEASURES ; thus, at § 1, four measures are supposed to be counted.

§ 3. Measures are divided into smaller portions, called PARTS OF MEASURES : thus, at § 1, measures are supposed to be divided into two parts, the first part of each measure being indicated by *one*, and the second part by *two*.

§ 4. Measures and parts of measures, may be indicated not only by counting (to the ear), but also by motions of the hand (to the eye), called BEATS, or BEATING THE TIME.

§ 5. In beating the time, a *downward* motion of the hand is usually made for the first part of a measure, and an *upward* motion for the second part.

§ 6. The first part of a measure should be *accented*, the second *unaccented*.

NOTE 1.—When the pupils commence learning to *beat the time*, it is well for them, not only to make the proper motions of the hand, but also to repeat the words *downward beat, upward beat, or, down, up*, as descriptive of the beats.

NOTE 2.—It should be thoroughly and practically understood, that this division of time is the *Rhythmic Element* ; the principle of measurement in all music. The portions of time called *measures* are to music, what the portions of time called *days, months, and years* are to history.

NOTE 3.—The letter *a* in *la* should receive its grave sound (*ā*) ; being the same sound as is heard in the words, *Fāther, Cālm, Bālm, Bār, Fār, Pā, Mā*. This vowel sound (*ah*), is the best for vocal practice, and is constantly used by all those who well understand the training of the voice.

## CHAPTER II.

## NOTES. BARS. RESTS.

§ 7. The length of tones is represented by written characters, called NOTES. Notes are signs, representing to the eye the comparative length or duration of sounds.

§ 8. Perpendicular marks are used for marking the division of measures, called BARS.

\* The departments are kept separate in this elementary treatise, not because they should be thus kept in teaching, but because being thus separated they present a clearer general view of the subject, and also because it is quite impossible to present the different topics in such an order as will be suited alike to different classes. The subject of Rhythmics is here presented first ; in teaching a class however, it may be just as well to commence with Melodics ; but with whichever department the work of teaching is commenced, it is certain that at least the two departments of Rhythmics and Melodics should be almost immediately united ; indeed the three departments should proceed simultaneously (or nearly so) from the beginning, and through the whole course of instruction.

§ 9. A measure, or part of a measure may be passed over in silence; such silence is called resting; and the sign or character by which it is indicated is called a Rest.

Illustration of measures; example of notes, bars and rests.

### CHAPTER III.

RHYTHMIC CLASSIFICATION. PROLONGED TONES. PRIMITIVE AND DERIVED FORMS OF MEASURE. LONG NOTES AND RESTS.

§ 10. A sound may be prolonged so as to occupy both parts of a measure; and thus a different form of measure may be obtained.

§ 11. The first form of measure, (a separate sound, or rest, being appropriated to each of its parts,) is called PRIMITIVE FORM.

§ 12. The second form of measure, (both parts being appropriated to one prolonged sound, or rest,) is called DERIVED FORM.

§ 13. Derived forms are obtained from primitive forms, by uniting the parts.

§ 14. The prolonged sound is represented by a note differing in form from that which was previously introduced, and which has also, its corresponding rest.

NOTE. The notes and rests may now be called short notes or long notes, and short rests or long rests.

ILLUSTRATION.

### CHAPTER IV.

TRIPLE MEASURE.

§ 15. A measure may have *three* parts; as *one, two, three; one, two, three; or, downward beat, hither (or inward) beat, upward beat.*

§ 16. A measure having three parts, is called TRIPLE MEASURE; a measure having two parts, is called DOUBLE MEASURE.

§ 17. Triple measure receives an accent on the first part.

§ 18. A sound may be prolonged so as to occupy two or three parts of a

measure; and thus derived forms are obtained in triple measure.

§ 19. When, the derived form is obtained by the union of the first and second parts of a measure, it is called the FIRST DERIVATIVE; when it is obtained by the union of the first, second and third parts it is called the SECOND DERIVATIVE.

§ 20. When, in a derived form of measure, the union of the parts commences with the first, the derivative is said to be in the FIRST CLASS; when the union commences with the second part of the measure, the derivative is said to be in the SECOND CLASS.

§ 21. When a tone commences on an *unaccented*, and is continued on an *accented* part of a measure, it is called a SYNCOPE,\* or SYNCOPATED TONE.

§ 22. A syncopated tone should always receive an accent.

§ 23. The longer sound, occupying three parts of a measure, is represented by a note of different form from the two previously introduced, which may now be called the longer note.

NOTE. A syncope changes, or "cuts into" the regular accent.

§ 24. Figures are used as signs of measure; thus, the figure **2** denotes *double*, and the figure **3**, *triple* measure.

ILLUSTRATION.

NOTE. The principle of induction never anticipates by names or terms anything which has not been already discovered or taught. In investigation this anticipation is impossible, in teaching it is inadmissible. Hence the pupils use such names or terms as most naturally come up in the mind, and if on further progress other names or terms become more convenient, they may then make the change. Again, induction never burdens the mind with names, or technical terms until they are needed as aids in bringing up to the imagination the idea of things which are already known.

\* Syncope. From two Greek words, signifying "I cut." † Representation of a Syncope.

## CHAPTER V.

## QUADRUPLÉ MEASURE.

§ 25. A measure may have four parts; as *one, two, three, four; one, two, three, four;* or *downward beat, hither (or inward) beat, thither (or outward) beat, upward beat.* Called QUADRUPLÉ MEASURE, and distinguished by the figure 4.

§ 26. When, in a derived form of measure, the union commences with the third part, it is said to be in the THIRD CLASS.

§ 27. When a sound is prolonged so as to occupy four parts of a measure it is represented by a note differing in form from those which have been previously introduced, and which we may call the longest note.

NOTE. The reason why the commonly received names of the notes have not before been given is explained in the note at the end of the last chapter; they may now be adopted, as follows:

	Notes.	Rests.
NOTE, WHOLE NOTE, or SEMIBREVE,.....		
THREEQUARTER NOTE, or DOTTED HALF, or MINIM,		
HALF NOTE, or MINIM,.....		
QUARTER NOTE, or CROCHET,.....

## CHAPTER VI.

## SEXTUPLE AND MIXED MEASURES.

§ 28. A measure having six parts, is called sextuple measure; as *one, two, three, four, five, six;* or *downward beat, downward beat, hither beat, thither beat, upward beat, upward beat.*

§ 29. A measure having six parts, is often described by two countings or beats, as is double measure; but it differs from double measure, since the latter consists of *two twos*, while the former consists of *two threes*. It is often called COMPOUND MEASURE.

§ 30. Measures may also have *nine*, or *twelve* parts, or more or less. But it is not supposed to be necessary, in this place, to give any further explanation or illustration, since, if the pupil is well grounded in the kinds already mentioned he need not apprehend difficulty, in any other forms of measure which may be found.

## CHAPTER VII.

## DIVIDED PARTS, OR COMPOUND FORMS OF MEASURE, AND THEIR CORRESPONDING NOTES AND RESTS.

§ 31. The parts of a measure may be divided, so that two sounds shall be made to occupy but one part.

§ 32. When two sounds occur on a single part of a measure, the measure is said to be in COMPOUND FORM.

§ 33. Compound forms of measure, may be either primitive or derived.

§ 34. The notes representing these shorter sounds, or Compound Primitive forms of measure, are called *Eighths*, or *Quavers*.

## ILLUSTRATION.

NOTE 1.—The forms of measure heretofore explained, may now be called SIMPLE FORMS; and thus be distinguished from Compound Forms.

NOTE 2.—The principle of derivation and classification, as heretofore explained, (derived from Kùbler, a truly philosophical writer upon elementary inductive teaching) can now be carried out in compound forms of measure, if the teacher thinks it best. If it be thoroughly and practically understood, it affords a certain criterion or principle, by which the musical

performer may be carried through the most difficult rhythmic combinations with certainty. The principle is simply this: The primitive form of a measure, or the primitive note of a measure, or part of a measure, is always to be taken as the standard of measurement. This cannot fail to solve any rhythmic difficulty that can occur. The common mode of measuring sounds by beating, is unsatisfactory and uncertain. Hence, a good conductor of an orchestra is frequently observed to indicate with his Baton, the primitive form of the measure, and this although he may know nothing of this principle of classification. This fact shows that the principle is a natural one, and one that fails not to accomplish its end. Whether the terms here used be adopted or not, the principle must be practically understood, the thing itself must be known, or there can be no certainty of correct time.

## CHAPTER VIII.

### TRIPLETS.

§ 35. A part of a measure may be so divided as to be occupied by three sounds. Such divisions of parts of measures are called Triplets. The notes representing triplets are marked by the figure 3.

## CHAPTER IX.

### COMPLEX FORMS OF MEASURE, AND THEIR CORRESPONDING NOTES AND RESTS.

§ 36. A part of a measure may be occupied by four sounds; such sounds are represented by notes called SIXTEENTHS or SEMIQUAVERS.

§ 37. When four sounds occupy a single part of a measure, the measure is said to be in COMPLEX FORM.

NOTE. A further explanation of Rhythmic Classification may be obtained from "The Boston Academy's Manual of Instruction."

See note 2, at § 34.

## CHAPTER X.

### VARIETIES OF MEASURE.

§ 38. Either of the different kinds of notes may be taken to represent the primitive form of measure, simple and compound. Thus, the primitive form in [2]

any kind of measure may be represented, by Whole Notes, Halves, Quarters, Eighthths, or Sixteenthths.

§ 39. The different representation or signs of measure, arising from the use of the different notes as primitive forms, are called VARIETIES OF MEASURE.

NOTE. Varieties of measure merely furnish different signs for the same thing. To the ear they are all the same, to the eye only do they differ; the movement or degree of quickness depending not in the least, on the kind of notes in which music is written. Notes represent no positive, but only a relative length of sound. The different varieties are comparatively unimportant, but are in common use.

§ 40. There may be as many varieties in all the different kinds of measure, as there are kinds of notes.

§ 41. As figures are used to distinguish the *kinds* of measure, so also they are used to distinguish the *varieties* of measure. When used for both purposes, the two figures are written in the form of fractions, the number of parts, (on which the *kind of measure* depends,) being indicated by the NUMERATOR; and the kind of note used on each part, (on which the *variety of measure* depends,) being indicated by the DENOMINATOR.

## MELODICS.

## CHAPTER XI.

§ 43. Musical sounds, considered or treated with reference to *relative pitch*, are arranged in a certain order, or series, called **THE SCALE**.\*

§ 44. The scale consists of eight tones; these are named numerically from the lowest, upward: **ONE, TWO, THREE, FOUR, FIVE, SIX, SEVEN, EIGHT**.

§ 45. Musical sounds may also be considered or treated *abstractly*, or with reference to *absolute pitch*. When thus considered they are named alphabetically from the letters, **A, B, C, D, E, F, G**.

**NOTE**.—In all nations where the generally prevalent system of music is received, the pitch of tones, as represented by letters, is the same.

§ 46. In treating of the scale, the tone **C**, is first taken (i. e. in the first steps of musical teaching) as one, or as the basis of the scale; so that the order of the scale is as follows:

One, Two, Three, Four, Five, Six, Seven, Eight.  
C, D, E, F, G, A, B, C.

§ 47. In vocal music, the following syllables are often used, in connection with the scale, or relative pitch.

Written, . . . . . Do, Re, Mi, Fa, Sol, La, Si, Do.

Pronounced, . . . Dō, Rā, Mē, Fā, Sōl, Lā, Sē, Dō.

**NOTE 1**.—See previous note on the true sound of the vowel ā.

**NOTE 2**.—The teacher is advised always to accustom his pupils to speak of the tones of the scale by their numerical, or relative names, as one, two, three, &c.: thus, if a lesson be written on the board, and the teacher wishing to question the scholars with respect to the tones, asks, pointing to any particular note, "What tone is represented by that note?" the answer should be, *one, two, three*, or as the case may be. But if he wishes to question with respect to the letters, he should ask directly, "What letter is one, two, &c., or what is the pitch of one, two, &c." He is advised also, not to allow his pupils to substitute, as names for tones, *first*, for one, *second* for two, &c.; nor to allow them to say *No. 1, No. 2, &c.*, but simply one, two, three, four, &c. He is further advised not to allow the pupils to regard the syllables as the names of the sounds; never to allow them to speak of the tone *Do*, the tone *Re*, &c.; but, in all cases, to consider the names of the sounds of the scale one, two, three, four, five, six, seven and eight.

**NOTE 3**.—Although the syllables are not regarded as indispensable, the following reasons may be assigned for their use: 1st. An association is quickly formed between each particular syllable, and the relative pitch of the tone to which it is applied; and this enables the inexperienced singer to strike the pitch with comparative ease. 2d. The proper practice of the syllables lays the foundation for a good articulation, or a correct delivery of words.

\* **SCALE**. Signifying a ladder, or series of steps.

It is obvious that, if the syllables are used for the first reason above mentioned, they should always be applied to the scale in the same manner; i. e., *Do to one, Re to two*, &c.; since they are intended to indicate *relative*, and not *absolute pitch*. The Italian or French method of using the syllables instead of letters, or to represent absolute pitch, is perhaps as good as any; but if the syllables are thus used, *Do* being synonymous with **C**, *Re* with **D**, &c., there can be no use for the letters, as we need but one method of designating absolute pitch. It must be evident also, to any one, that in this use of the syllables, no such advantage can be derived from them as is mentioned above. The only advantage that is claimed by those who would make the syllables synonymous with the letters is, that in this way, it is easier for the pupil to apply the syllables to the notes, since each syllable will always occupy the same place on the staff. The question then is, "are the advantages of associating the syllables with the sounds of the scale, greater than the difficulty of applying them?" If the answer is in the affirmative, then the use of the syllables here recommended, is the best use of them; if in the negative, the syllables had better be given up altogether, and the German method of using only the one syllable *La* for all the tones be adopted.

## CHAPTER XII.

## THE STAFF AND CLEFS.

§ 48. The scale (or the relative pitch of tones) is represented by notes in connection with a character called **THE STAFF**.

§ 49. The staff consists of five horizontal marks or lines, and the spaces between them.

**NOTE**.—*Five* is adopted for the number of lines, as a matter of convenience, but not of necessity.

§ 50. Each line and each space is called a **DEGREE**; thus, there are in the staff, nine degrees, *five* lines and *four* spaces

§ 51. The degrees of the staff are counted upwards, from the lowest.

§ 52. If it be desirable to extend the compass of the staff, spaces and lines, below or above, are used, called **SPACES BELOW**, or **SPACES ABOVE**, and **ADDED LINES BELOW**, or **ADDED LINES ABOVE**.

§ 53. The scale may be represented on the staff in various ways: thus, the note representing one may be placed upon the first line or first space, second line or second space, or upon any degree of the staff; but when the position of one is fixed, the other sounds must follow in regular succession.

§ 54. There are two ways in which it is common to represent the scale on the staff: first, the note for one being written upon the *added line below*; second, the note for one being written upon the *second space*.

§ 55. To distinguish between these two ways, or to determine the position of the scale on the staff, a letter is used as a guide, called a **CLEF**.\*

\* **Clef**. Signifying *Key*.

§ 56. There are two letters commonly used as clefs, F and G.

NOTE 1.—The form of these letters when used as Clefs can be pointed out by the Teacher.

NOTE 2.—The letter C is also taken for a clef, but as it is not much in use in this country, and as it is fast going out of use in England and Germany, it is not thought necessary to explain it here.

§ 57. The F Clef is placed upon the fourth line; hence when this clef is used the note representing one (C) must be placed upon the second space.

§ 58. The G Clef is placed upon the second line; hence when this clef is used the note representing one (C) must be placed upon the added line below.

## CHAPTER XIII.

## MELODICS.—EXTENSION OF THE SCALE AND CLASSIFICATION OF VOICES.

§ 59. When tones higher than eight are sung, eight is to be regarded as one of an upper scale.

§ 60. When tones lower than one are sung, one is to be regarded as eight of a lower scale.

§ 61. The human voice is naturally divided into four classes: low male voices, or **BASE**; high male voices, or **TENOR**; low female voices, or **ALTO**; high female voices, or **TREBLE**.

NOTE.—Besides the above, there are also other distinctions, as **BARYTONE**, between the **Base** and **Tenor**. And the **MEZZO SOPRANO**, between the **Alto** and **Treble**. The **Treble** is often called **SOPRANO**.

§ 62. The G clef is used, not only for the **Treble** and **Alto**, but also often for the **Tenor**; but when used for the **Tenor**, it denotes G an octave lower than when used for the **Treble** and **Alto**. The following table exhibits the common use of the clefs: and also the usual compass and relative position of the different parts:—

## EXAMPLE.

§ 63. To distinguish between the different tones denoted by the same letter, capital and small letters, together with marks below or above them, are used. Thus, in the above example, the lowest three notes are designated by *capital letters*; and the tones represented by them are called capital, or great G, or great A, and great B. The notes in the next octave beginning with c, (with the exception of the upper one, which is considered as one of the octave above,) are designated by *small letters*, and the tones are called *small c*, *small d*, *small e*, &c. The notes in the next octave, (with the exception of the upper one,) are designated by *once-marked small letters*, and the tones are called *once-marked small c*, *once-marked small d*, &c. The notes belonging to the next octave, are designated by *twice-marked small letters*. The G clef, when used for **Treble** or **Alto** voices, signifies *g*; when used for **Tenor** voices, it signifies *g*.

NOTE 1.—This system of designating the tones is carried out through the whole extent of the great scale of sounds in instrumental music, consisting of nine or ten octaves, as follows:—The first, or lowest octave, is denoted by *twice-marked capitals*, as C (or CCC), D (or DDD), &c.

The next, or second octave, is denoted by *once-marked capitals*, as C, D, E, &c. The third octave, (the upper part of which comes within the vocal compass as exhibited above,) is denoted by *capitals*, as C, D, E, &c. The fourth octave, by *small letters*, as c, d, e, &c. The fifth octave, by *once-marked small letters*, as c, d, e, &c. The sixth octave, by *twice-marked small letters*, as c, d, e, &c. The seventh octave, by *three-times-marked small letters*, as c, d, e, &c. The eighth octave, by *four-times-marked small letters*, as c, d, e, &c. The ninth octave, by *five-times-marked small letters*; and the tenth octave, by *six-times-marked small letters*.

NOTE 2.—It is important that the difference of pitch between male and female voices be fully explained and illustrated.

## CHAPTER XIV.

### INTERVALS. STEPS AND HALF-STEPS.

§ 64. The difference of pitch between any two tones, is called AN INTERVAL. Thus, the difference of pitch between one and two, is an interval.

§ 65. In the regular succession of the tones of the scale, there are two kinds of intervals, larger and smaller.

§ 66. The larger intervals are called STEPS, or LARGE STEPS; and the smaller intervals are called SMALL STEPS, or HALF-STEPS.\*

§ 67 The intervals of the scale occur in the following order:—between one and two, a *step*; between two and three, a *step*; between three and four, a *small step*; between four and five, a *step*; between five and six, a *step*; between six and seven, a *step*; and between seven and eight, a *small step*.

\* The terms *tone* and *half-tone* are in common use to designate these intervals; but as the application of the same word both to sounds and intervals is inconvenient, the discontinuance of the term *tone* and *half-tone* is recommended, especially in teaching. The objection to the introduction of the terms major second and minor second is explained in a note on page 7; besides which it may be added that these terms are wanted for another purpose, and in another connection, as the pupil advances.

## CHAPTER XV.

### MELODICS.—THE CHROMATIC SCALE.

§ 68. Between those tones of the scale which form the interval of a step, an intermediate, or CHROMATIC\* tone may be introduced: thus, intermediate or chromatic tones may occur between 1 and 2, 2 and 3, 4 and 5, 5 and 6, 6 and 7; but not between 3 and 4, and 7 and 8, because the intervals between these tones are already half-steps, and these are the smallest practicable intervals.

§ 69. Intermediate or chromatic tones are named numerically (relative pitch) from one of the tones of the diatonic scale between which they occur, but with the word SHARP or FLAT, or a character called a sharp (#) or a flat (b) in connection, to distinguish them from the diatonic tones: thus, the intermediate tone between one and two, if named from one, is called SHARP ONE (#1); and if named from two, is called FLAT TWO (b2).†

The intermediate tones are also named alphabetically (absolute pitch) from one of the letters between which they occur, with the word sharp or flat also in connection: thus, the chromatic tone between C and D, if named from C, is called C SHARP (C#); and if named from D, is called D FLAT (Db).

§ 70. The note representing an intermediate or chromatic tone, is written on the same degree of the staff as the note representing the tone from which it is named: thus, sharp one is written on the same degree of the staff as one; flat two is written on the same degree as two, &c.

§ 71. A scale of thirteen tones, including all the intermediate, or chromatic tones, with twelve intervals of a half-step each, is called THE CHROMATIC SCALE.

§ 72. The scale which has been heretofore described may now be called THE DIATONIC SCALE.

DIATONIC. From two Greek words, signifying *through the tones*, or *from tone to tone*.

\* CHROMATIC. From a Greek word, signifying *color*. The intermediate, or chromatic tones, having been formerly written with colored ink. The term may also have a figurative significance, as chromatics in music, may be regarded as analogous to coloring in painting.

† Sharp, in the technical use of the word, signifies higher: thus, the meaning of *sharp one* is, *higher than one*. Flat signifies lower: thus, the meaning of *flat two* is, *lower than two*.

## EXAMPLE.

THE CHROMATIC SCALE. *Notes, Letters and Syllables.*

**Ascending.**

**Descending.**

NOTE.—Di is pronounced *Dē*, Fi *Fē*, &c.  
Se is pronounced *Sā*, Le *Lā*, &c.

§ 73. The sign of an intermediate or chromatic tone ( $\sharp$  or  $\flat$ ) belongs not only to the note before which it is placed, but also to all the following notes on the same degree of the staff in the measure.

§ 74. The sign of a chromatic tone belongs to all the notes that follow it, from measure to measure, when no intervening note occurs on another degree of the staff.

§ 75. The sign of an intermediate, or chromatic tone ( $\sharp$  or  $\flat$ ), is canceled, or annulled by a character called a NATURAL ( $\natural$ ).\*

## CHAPTER XVI.

## DIATONIC INTERVALS.

§ 76. In addition to those intervals called steps and half-steps, belonging to the scale in its regular progression, there are also other intervals occasioned by

\* The name of this character seems not to have been well chosen, since it tends to mislead the mind of the pupil. It signifies, not that one sound is more natural than another, but merely that the connection which has heretofore existed between a note and a sharp or flat is now dissolved. The teacher is advised never to use the term *natural* in connection with the names of the tones, or to speak of C natural, B natural, natural one, natural four, &c.; but to say simply C, B, &c., or one, four, &c. The fact is, that C $\sharp$  is just as natural a tone as C, and so of all the tones of the chromatic scale; one is just as natural as another, and a little child, who chooses the pitch of a song, is just as likely to commence with C $\sharp$  as with C, or with F $\sharp$  as with F, &c. The term *natural* applies not to the thing itself, but to the mere sign of the thing; not to a tone, but to the mere sign of a tone; hence, its careless use often renders musical language obscure or absurd.

skipping: as SECONDS, THIRDS, FOURTHS, FIFTHS, SIXTHS, SEVENTHS, AND OCTAVES.

§ 77. Intervals are always reckoned from the lower tone upwards, unless otherwise expressed.

## DIATONIC INTERVALS.

NOTE.—Diatonic, because they are produced by skips in the diatonic scale.

§ 78. Two tones being the same pitch, are called UNISON, or said to be in UNISON.

§ 79. The interval between 1 and 2, or 2 and 3, or between any tone and the tone that is represented on the second degree of the staff, inclusive, above it, is called a SECOND.

§ 80. The interval between 1 and 3, or between 2 and 4, or between any tone and the tone that is represented on the third degree of the staff, inclusive, above it, is called a THIRD.

§ 81. The interval between 1 and 4, or between 2 and 5, is called a FOURTH

§ 82. The interval between 1 and 5, or between 2 and 6, is called a FIFTH.

§ 83. The interval between 1 and 6, or between 2 and 7, is called a SIXTH.

§ 84. The interval between 1 and 7, or between 2 and 8, is called a SEVENTH.

§ 85. The interval between 1 and 8, or between 2 and 9, (or 2 of the next series) is called an OCTAVE.

## CHAPTER XVII.

## INTERVALS. MAJOR AND MINOR.

§ 86. *Seconds.*

1. A second consisting of a *half-step*, is a MINOR SECOND.
2. A second consisting of a *step*, is a MAJOR SECOND.

§ 87. *Thirds.*

1. A third consisting of a *step* and a *half-step*, is MINOR.
2. A third consisting of *two steps*, is MAJOR.

§ 88. *Fourths.*

1. A fourth consisting of *two steps*, and one *half-step*, is a PERFECT FOURTH.
2. A fourth consisting of *three steps*, is a SHARP FOURTH.

§ 89. *Fifths.*

1. A fifth consisting of *two steps* and *two half-steps*, is a FLAT FIFTH.
2. A fifth consisting of *three steps* and a *half-step*, is a PERFECT FIFTH.

§ 90. *Sixths.*

1. A sixth consisting of *three steps* and *two half-steps*, is MINOR.
2. A sixth consisting of *four steps* and a *half-step*, is MAJOR.

§ 91. *Sevenths.*

1. A seventh consisting of *four steps* and *two half-steps*, is a FLAT SEVENTH.
2. A seventh consisting of *five steps* and *one half-step*, is a SHARP SEVENTH.

§ 92. *Octave.* An OCTAVE consists of *five steps* and *two half-steps*.

NOTE.—In addition to the intervals already mentioned, there are others arising out of the chromatic scale, but as they properly belong to the study of harmony, further notice of them is omitted in this work.

## CHAPTER XVIII.

## TRANSPOSITION OF THE SCALE.

§ 93. *Preliminary remark.*—It will be borne in mind that the scale is a succession of sounds, irrespective of any definite pitch, but which sounds bear one to another a fixed relation; this relation consisting in, or depending upon, the intervals or differences of pitch between them. It will also be remembered that, letters represent the absolute pitch of sounds; and that the pitch of each letter is unalterably fixed.

§ 94. When the scale begins with C, or when C is taken as one, or as the pitch of the scale, it is said to be in its NATURAL POSITION; \* but the pitch may be changed, and any other letter may be taken as one, in which case the scale is said to be TRANSPOSED. Transposition consists in changing the pitch, or in taking any other letter than C as one, or as the basis of the scale.

§ 95. The letter which is taken as one, is called the KEY LETTER, or KEY NOTE, or simply the KEY. Thus, if the scale be in its natural position, with C as one, it is said to be in the KEY of C. If its pitch be changed, and D be taken as one, it is said to be in the KEY of D, and so on. By the key of C, is meant that the scale is based on C, or that C is taken as one; by the key of D, is meant that the scale is based on D, or that D is taken as one, and so on.

§ 96. In transposing the scale, the proper order of intervals, must be preserved. Thus, in every key, the intervals *must be* as follows: between one and two, a *step*; between two and three, a *step*; between three and four, a

*half-step*; between four and five, a *step*; between five and six, a *step*; between six and seven, a *step*; and between seven and eight, a *half-step*.

§ 97. The interval between one letter and another is fixed, and cannot be altered. Thus, the interval is a *step* between C and D, a *step* between D and E, a *half-step* between E and F, a *step* between F and G, a *step* between G and A, a *step* between A and B, and a *half-step* between B and C.

§ 98. In the transposition of the scale, the proper order of intervals is preserved by the use of the intermediate (sharp or flat) tones: or, in other words in the transposition of the scale, it becomes necessary to omit certain tones belonging to the given key, or key from which the transposition is made, and to take from the chromatic scale such other tones as may be required to constitute the new key, or to preserve the proper order of its intervals.\*

## ILLUSTRATION.

EXPLANATION.—The above diagram is designed to represent the chromatic scale, in which each interval is a half-step. The figures *above*, are intended to represent the scale in its natural position (key of C), C as one, D as two, &c. The figures *below*, are intended to represent the scale transposed into the key of D, D as one, E as two, F# as three, &c.

It will be observed, that if D be one, E must be two, because the interval between one and two must be a *step*; F will not do for three, because the interval between E and F is but a *half-step*, whereas, the interval between two and three must be a *step*; F therefore is omitted, and F# is taken for THREE. Between three and four, the interval must be a *half-step*; and the interval between F# and G is a *half-step*; G, therefore, is FOUR. Between four and five, the interval must be a *step*, and the interval between G and A is a *step*; A, therefore, is FIVE. Between five and six, the interval must be a *step*, and the interval between A and B is a *step*; B, therefore, is SIX. Between six and seven, the interval must be a *step*; but as the interval between B and C is but a *half-step*, C will not do for seven; C# is therefore taken for SEVEN, and the proper interval is thus obtained. Between seven and eight, the interval must be a *half-step*, and the interval between C# and D is a *half-step*; D, therefore, is EIGHT.

## CHAPTER XIX.

## TRANSPOSITION OF THE SCALE BY FIFTHS.

## § 99. First transposition of the scale by fifths: from C to G.

\* The term natural, as here used, has only reference to the characters by which the scale is represented, not to the scale itself, since the scale itself is just as natural in any other key as it is in C. (See note on page 18.)

\* The difficulty, in transposition, consists in the transfer of the absolute pitch of sounds, to the relative pitch of the scale.

§ 100. To preserve the proper order of intervals between *six* and *seven*, and between *seven* and *eight* in this transposition, it is necessary to take F# as seven in the new key.

§ 101. The sign of F# (#) is placed at the beginning of the staff, or immediately after the clef, and is called the SIGNATURE (sign) of the key. Thus, the signature to the key of G, is ONE SHARP, or F#. The signature to the key of C is said to be NATURAL.

## EXAMPLE. KEY OF G.

## ILLUSTRATION.

EXPLANATION.—On the upper staff, in the above diagram, the scale is represented in the key of G. The distances of the notes, one from another, represent the different intervals, as steps and half-steps. On the lower staff G is taken as one, A as two, B as three, C as four, D as five, E as six; and thus far the intervals are right. But as the interval between six and seven must be a *step*, it is seen at once, that F will not do for seven, because the interval between E and F, is but a *half-step*; it becomes necessary, therefore, to take the intermediate tone, F#, for seven, and this gives the proper interval between six and seven, viz., a *step*. The interval between F# and G being a *half-step*, G is taken as eight, and the scale is complete in the key of G, thus—

NOTE.—No illustration of the transposition of the scale by diagrams, or which is in any way presented to the eye, can be fully satisfactory, or cause this subject to be practically understood. It can only be thoroughly taught by audible examples, or vocal or instrumental elucidations.

## CHAPTER XX.

## RELATION OF TONES. TONE OF TRANSPOSITION.

§ 102. Tones are said to be related as follows: if C be one, D is two, E is three, &c.; or, D is *two*, considered in respect to its relation to C as *one*; so, also, E is *three*, F is *four*, G is *five*, A is *six*, and B is *seven*.

And again: C# is *sharp one*, D# is *sharp two*, F# is *sharp four*, G# is *sharp five*, and A# is *sharp six*, when considered in relation to C as *one*.

And again: Db is *flat two*, Eb is *flat three*, Gb is *flat five*, Ab is *flat six*, and Bb is *flat seven*, when considered in relation to C as *one*.

§ 103. The intermediate tone required in transposition, is called THE TONE OF TRANSPOSITION, or, (in written music) THE NOTE OF TRANSPOSITION. Thus, the tone or note of transposition between the keys of C and G is F#.

§ 104. It will be observed that, in the foregoing transposition from C to G, the pitch of the scale has been removed a *fifth*;\* and that the intermediate tone F#, or *sharp four*, has been found necessary to preserve the proper order of the intervals; hence the following rule: "*Sharp four transposes the scale a fifth*;" or, "*The tone of transposition, between any key and its fifth, is sharp four.*"

## CHAPTER XXI.

## TRANSPOSITION OF THE SCALE BY FIFTHS, CONTINUED.

§ 105. Second transposition of the scale by fifths; from G to D.

§ 106. To preserve the proper order of intervals between *six* and *seven*, and between *seven* and *eight* in this transposition, it is necessary to take C# as seven in the new key.

§ 107. The sign of C# (#) is placed at the beginning of the staff, a little to the right of the previous sharp, and the two sharps (F# and C#) are taken together as the sign of the key, or as the signature.

## EXAMPLE. KEY OF D.

\* Or a fourth below.

## ILLUSTRATION.

NOTE.—An explanation of the above diagram is supposed to be unnecessary, as it would be similar to that at § 101.

§ 108. Third transposition of the scale by fifths, from D to A. G# is sharp four to D. G#, therefore, is the next sharp introduced.

## EXAMPLE. KEY OF A.

§ 109. Fourth transposition of the scale by fifths; from A to E. D# is sharp four to A. D#, therefore, is the next sharp.

## EXAMPLE. KEY OF E.

§ 110. Fifth transposition by fifths; from E to B. A# is sharp four to E.

## EXAMPLE. KEY OF B. (Same as C#.)

§ 111. Sixth transposition by fifths; from B to F#. E# is sharp four to B.

## EXAMPLE. KEY OF F#. (Same as G#.)

§ 112. Seventh transposition by fifths; from F# to C#. B# is sharp four to F#.

## EXAMPLE. KEY OF C#. (Same as D#.)

§ 113. Eighth transposition by fifths; from C# to G#. F DOUBLE SHARP (written thus: Fx,) is sharp four to C#.

## EXAMPLE. KEY OF G#. (Same as A#.)

§ 114. The scale may be still further transposed by fifths: to the key of D#, with nine sharps (two double sharps); to the key of A#, with ten sharps (three double sharps); to the key of E#, with eleven sharps (four double sharps); to the key of B#, with twelve sharps (five double sharps), and so on.

NOTE 1.—The key of B# is the same to the ear as the key of C. The difference is not in the thing itself, but merely in the sign.

NOTE 2.—The keys beyond F# (six sharps) are but seldom used, as the same variety may be more easily obtained in transposition by flats. The keys beyond E (four sharps) are seldom used in church music.

## CHAPTER XXII.

## TRANSPOSITION OF THE SCALE BY FOURTHS.

§ 115. First transposition of the scale by fourths; from C to F.

§ 116. To preserve the proper order of intervals between *three and four*, and between *four and five* in this transposition, it is necessary to take B $\flat$  as four in the new key. B $\flat$  is, therefore, the signature to the key of F.

## EXAMPLE. KEY OF F.

## ILLUSTRATION.

NOTE.—An explanation of the above diagram would be so similar to that at § 103, that it is supposed to be unnecessary. It will be observed that B $\flat$  is taken for four, and not A $\sharp$ , because the scale must always proceed from one letter to another; A $\sharp$  cannot follow A, in the diatonic scale.

§ 117. It will be observed that, in the foregoing transposition from C to F, the pitch of the scale has been removed a *fourth*;\* and the intermediate tone, B $\flat$ , or *flat seven*, has been found necessary to preserve the proper order of the intervals. Hence the following rule: “*Flat seven transposes the scale a fourth*,” or, “*The tone or note of transposition, between any key and its fourth, is flat seven*.”

§ 118. Second transposition of the scale by fourths; from F to B $\flat$ .

§ 119. To preserve the proper order of intervals between *three and four*,

\* A fifth below.

and between *four and five* in this transposition, it is necessary to take E $\flat$  as four in the new key.

§ 127. The scale may be still further transposed by fourths: to the key of  $B^{\flat\flat}$ , with nine flats (two double flats); to the key of  $E^{\flat\flat}$ , with ten flats (three double flats); to the key of  $A^{\flat\flat}$ , with eleven flats (four double flats); to the key of  $D^{\flat\flat}$ , with twelve flats (five double flats); and so on.

NOTE 1.—The key of  $D^{\flat\flat}$  is the same to the ear as the key of  $C$ . The difference is not in the thing itself, but merely in the sign.

NOTE 2.—The keys beyond  $G^b$  (six flats) are but seldom used, as the same variety may be more easily obtained in transpositions by sharps. The keys beyond  $A^b$  (four flats) are seldom used in church music.

## CHAPTER XXIII.

### MINOR SCALE.

§ 128. In addition to the scale as explained at Chapter 11, there is another diatonic scale, differing from that in respect to its intervals, called the MINOR SCALE. The former scale is called MAJOR.

§ 129. The intervals in the minor scale are as follows: between one and two a *step*; between two and three, a *half-step*; between three and four, a *step*; between four and five, a *step*; between five and six, a *half-step*; between six and seven, a *step* and a *half-step*; and between seven and eight, a *half-step*.

1		2		3		4		5		6		7		8

NOTE.—There are also other forms of the minor scale, but it is not considered necessary to explain them since it can be of no practical importance to the singer; the person who can sing the scale in the form here given, or rather who has made some little progress in the practice of the chromatic scale, will find no difficulty in any form of the minor scale.

§ 130. The minor scale, in its first or natural position, commences with  $A$ , or  $A$  is taken as *one*, as in the above example.

§ 131. When the major and minor scales have the same signature, they are said to be related. Thus the key of  $C$  major is the relative major to  $A$  minor; and the key of  $A$  minor is the relative minor to  $C$  major.

§ 132. The relative minor to any major key is found a sixth above it, or is based upon its sixth; and the relative major to any minor key is found a third above it, or is based upon its third.

§ 133. The letters and syllables correspond in the major and its relative minor. Thus, the syllable *Do*, is applied to  $C$  in both cases, although it is *one* in the major, and *three* in the minor scale, &c.

## DYNAMICS.

## CHAPTER XXIV.

## DYNAMIC DEGREES.

§ 134. A tone which is neither loud or soft, is a *medium*, or *middle* tone; it is called *MEZZO* (pronounced *met-zo*, or *mate-zo*), and is marked *m*.

§ 135. A tone somewhat softer than *metzo*, is a *soft* tone; it is called *PIANO* (pronounced *pee-án-o*), and is marked *p*.

§ 136. A tone somewhat louder than *metzo* is a *loud* tone; it is called *FORTE*, and is marked *f*.

§ 137. A tone somewhat softer than *piano*, yet so loud as to be a good audible sound, is called *PIANISSIMO* (pronounced *pee-an-is-si-mo*), and is marked *pp*.

§ 138. A tone somewhat louder than *forte*, but not so loud as to degenerate into a scream, is called *FORTISSIMO*, and is marked *ff*.

NOTE.—Mezzo, Piano and Forte, are Italian words, which, by long usage, have become technical terms in music, and are used by all nations.

## CHAPTER XXV.

## DYNAMIC TONES.

§ 139. ORGAN TONE. A tone commenced, continued, and ended, with an equal degree of power, is called an ORGAN TONE. (=====)

§ 140. CRESCENDO. A tone commencing soft, and gradually increasing to loud, is called CRESCENDO. (*Cres.* or <=)

§ 141. DIMINUENDO. A tone commencing loud, and gradually diminishing to soft, is called DIMINUENDO. (*Dim.* or >=)

§ 142. SWELL. An union of the crescendo and diminuendo, produces the SWELLING TONE, or SWELL. (<=>)

§ 143. PRESSURE TONE. A very sudden *crescendo*, or *swell*, is called a PRESSURE TONE. (< or <=)

§ 144. EXPULSIVE OR EXPLOSIVE TONE. A tone which is struck suddenly and forcibly, and instantly diminished, is called an EXPULSIVE, or EXPLOSIVE TONE; also FORZANDO, or SFORZANDO. (> or *sf. fz.*)

NOTE.—The proper application of dynamics, constitutes the form of musical expression.

## CHAPTER XXVI.

## MISCELLANEOUS SIGNS OR CHARACTERS.

§ 145. PASSING NOTES. Notes of comparatively small size are often used called PASSING NOTES.

NOTE.—Passing notes are used to represent tones that do not essentially belong to a melody, but which are regarded as tasteful or ornamental.

§ 146. APPOGGIATURE. When a passing note precedes an essential note, on an *accented* part of the measure, it is called an APPOGGIATURE.

§ 147. AFTER NOTE. When a passing note follows an essential note, on an *unaccented* part of a measure, it is called an AFTER NOTE.

## EXAMPLES.

## APPOGGIATURE.

## AFTER NOTE.

§ 148. SHAKE OR TRILL. The SHAKE (tr) consists of a rapid alternation of two sounds. It should be cultivated by those who would acquire smoothness and flexibility of voice.

## EXAMPLE.

## SHAKE OR TRILL REPRESENTED.

§ 149. **TURN.** The **TURN** consists of a principal sound, with the sounds next above and below it. It should be performed with care and neatness, but not too quick. Its sign is ( ~ ).

## EXAMPLES.

§ 150. **LEGATO.** When a passage is performed in a close, smooth, and gliding manner, it is said to be **LEGATO**.

## EXAMPLE.

§ 151. **STACCATO.** When a passage is performed in a pointed, distinct, and articulate manner, it is said to be **STACCATO**. ||||

## EXAMPLES.

§ 152. **TIE.** A character, called a **TIE**, is used to show how many notes belong to one syllable. It is also used to denote the legato style.

§ 153. **PAUSE.** When the duration of a tone, is to be prolonged beyond its usual time, a character called a **PAUSE** is placed over the note by which it is represented.

§ 154. **DOUBLE BAR.** A **DOUBLE BAR** || or || shows the end of a strain of music, or of a line of the poetry.

§ 155. **BRACE.** A **BRACE** is used to connect the staves on which the different parts are written.

§ 156. **DIRECT.** The **DIRECT** ( ~ ) is sometimes used at the end of a staff, to show on what degree of the following staff the first note is placed.

## CHAPTER XXVII.

## EXPRESSION OF WORDS, AND MISCELLANEOUS DIRECTIONS.

§ 157. **TONIC SOUNDS.** The tonic (vowel) sounds only should be sustained in singing. It is on these alone that the voice should dwell. They should be delivered with accuracy, and carefully prolonged, without being changed. To insure this, the vocal organs should be immovably fixed from the beginning to the end of a tone; not the least change should be allowed in the position of the throat, mouth, or tongue; nor indeed of the head or body.

It is a very common fault for singers to change the tonic sounds, and dwell not on the *radical*, but on the *vanish* or closing sound; thus *a* becomes *e*; *o* *oo*; &c. In the word "great," for example, instead of dwelling steadily upon the tonic sound *a*, the singer changes it to *e*, and that which should be *grea* - - - t, becomes *grea* - - - e - - - t; so also in the syllable applied to *Two*—let it be *Ra* - - - e, and not *Ra* - e - - - .

§ 158. **CONSONANTS.** Articulation is essentially dependant on the consonants. These should, therefore, receive very particular attention, and be delivered quickly, smartly, distinctly, and with the greatest precision. The neglect of a careful utterance of the consonants, is often a principal cause of indistinctness in singing.

§ 159. **ACCENT.** Accent is as important in singing as in speaking. If the poetry be regular in its construction, and is properly adapted to the music, the accentuation of the two will correspond. If otherwise, that of the former must, in general, be attended to, and the musical accent made to conform to it.

§ 160. **PAUSE.** Pauses, especially rhetorical pauses, are essential to good singing. In general, when necessary, they must be obtained, not by an interruption of rhythmic divisions, as is the case in the use of the character called a pause. But by shortening the preceding note; thus:

§ 161. **EMPHASIS.** Emphatic words should be given with greater or less power, often with *sf.*, and without reference to rhythmic accent. In common psalmody its application is difficult, from the frequent want of a proper adaptation of the poetry to the music, or rhythmic appropriateness of one to the other. The effect of emphasis may often be increased by a momentary pause. (See § 160.)

§ 162. **OPENING OF THE MOUTH.** The mouth should, in general, be freely opened. It is very common for singers not to open their mouth sufficiently wide to give a free and full passage to the sound.

§ 163. **TAKING BREATH.** (1) In taking breath, make as little noise as possible.

(2) Let it be done quickly, and without any change in the position of the mouth.

(3) Never breathe between the different syllables of the same word.

(4) When several notes come together, to one syllable, do not breathe between them, except in long running passages, or divisions where it cannot be avoided.

(5) Words which are intimately connected in sense, as the article and its noun, or the preposition and its noun, should not be separated by taking breath.

(6) The practice of breathing at a particular part of the measure, or of rhythmic breathing, should be avoided.

(7) Take breath no more frequently than is necessary.

(8) Exercises on the explosive tone (*fz.* or *sf.*) will assist in acquiring the art of taking breath.

§ 164. **QUALITY OF TONE.** The most essential qualities of a good tone, are *purity, fullness, firmness, and certainty*

(1) A tone is **PURE**, or clear, when no extraneous sound mixes with it; **IMPURE**, when something like a hissing, screaming, or huskiness is heard. Impurity is often produced by an improper position of the mouth.

(2) A tone is **FULL**, when it is delivered in a free and unconstrained use of the appropriate organs of sound. A tone is **FAINT**, when it is produced by a careless or negligent use of the organs.

(3 and 4) A tone is **FIRM** and **CERTAIN**, which, being correctly given, is held steadily, without change: and which seems to be perfectly under the control of the performer. Hence, the following are faults, viz:—

(1) Striking below the proper sound and sliding up to it, as from *five* to *eight*, &c.

(2) A wavering, or trembling of the voice.

(3) A change just at the close of the tone, produced by a careless relaxation of the organs, which should always be held firm and immovable in their proper position, until the sound ceases.

§ 165. **TO CORRECT FAULTS.** Whenever the teacher discovers a fault, let him first imitate it himself, and afterwards give the true style of performance; then let him require the pupil to imitate both the bad and the good example. It is not sufficient for the teacher to say that a certain fault exists, he must actually point it out, or exhibit it by his own performance, and this over and over again, until the pupil obtains a clear perception of it, and knows both how to produce it, and how to avoid it.

§ 166. In all vocal performances, attend to the spirit of the words. Enter into those emotions which are expressed by the poetry. Avoid a dull, heavy, unmeaning, unfeeling, automaton-like style of performance, and cultivate that which comes from the heart, which has some soul, some meaning, and which is appropriate to the words and music. The composer does but furnish the mere skeleton, and it depends upon the performer to say whether that inanimate form shall live, and breathe, and move, so as to take deep hold of the affections and control the feelings of others, thus producing the effects for which music is designed, and for which it is so admirably adapted.

NOTE. The following exercises are gradually progressive. They have been prepared with reference to such persons as are beginning to learn to read music, or to sing by note or from written characters, whether children or adults. They are intended particularly for singing schools, and are equally well adapted to the wants of the teacher who pursues either the inductive or preceptive method of teaching, or who unites in his practice both of these methods, according to the circumstances of his class. They are designed both as illustrations, and also as practical exercises to be sung by the pupils as they proceed from step to step in their work. Previous illustrations or exercises of a more simple character may be required, but these every good teacher will be able to write upon the board at the instant when they are wanted.

But there is another important view in which we desire to present these lessons. They are so arranged as to constitute in themselves, a complete practical system or method of teaching, independent of the investigations of the inductive teacher on the one hand, and of the *a priori* rules of the preceptive teacher on the other, and they may be pursued without reference to the axioms, explanations or definitions laid down in this or any other book. The class, therefore, which is ready to begin to learn to read music, may begin at once in the use of these lessons; this mode of teaching, which will be new to many, (and it may be made an excellent one,) we will attempt very briefly to describe.

The class being ready to receive instruction, the first step on the part of the teacher may be to write on the board the first lesson, or a similar one. This being done he calls the attention of the class, and pointing to the notes, he sings do, do, re, re, or as the lesson may be. After a few repetitions so that he may be perfectly understood, he requires the class to do the same thing, or to sing the lesson as he has done, he pointing to the notes as before; and this without any naming of characters, or pointing out their use, or previous explanations whatever. After a few lessons in this way from the board, he may proceed in a similar manner in the use of the printed exercises contained in the book; gradually and as it were, incidentally explaining the uses of different characters, and giving them their appropriate names. This describing and naming of characters, however, should always be an *after* and not a *fore* work; it should not receive attention until the *practical part* which has preceded it is quite well understood; and even then it is never to be regarded as a very important part of the teacher's work, which should consist mainly in teaching his pupils to *sing the lesson*; they looking at the notes or characters while they sing; for by *looking* they will *learn*. Let this course be gradually pursued, and it will be found one of the shortest and most certain singing school methods.

We do not mean, however, to recommend it to the neglect of those before mentioned. The best teacher will not be confined to any particular previously laid out plan, but will from the different methods make out one of his own; not indeed one that is stereotyped and unalterable, but one that he may modify and adapt to the varying wants and circumstances of his different classes.

But whatever may be the method of the teacher, if he teaches the commonly received principles of music, and of musical notation, he will find the following lessons adapted to his purpose; since these universally received principles of music are here gradually developed and illustrated.

2. A sacred spring, at thy command, From Zion's mount, in Canaan's land, Beside thy temple cleaves the ground, And pours its limpid stream around, And pours its lim-pid stream a-round.

3. This gentle stream, with sudden force, Swells to a riv-er in its course; Thro' desert realms its windings play, And scatters blessings all the way, And scatters bless-ings all the way.

4. Close by its banks, in order fair, The blooming trees of life appear; Their blossoms fragrant odors, give, And on their fruit the na-tions live, And on their fruit the na-tions live.

5. Flow, wondrous stream! with glory crowned, Flow on to earth's remotest bound; And bear us, on thy gentle wave; To him who all thy virtues gave, To him who all thy vir-tues gave.

## HUBBARDSTON. L. M.

Recitanto.

1. Ye Christian he-ros, go proclaim Sal-va-tion in Im-man-uel's name; To dis-tant climes the tidings bear, And plant the rose of Shar-ron there.

2. He'll shield you with a wall of fire— With ho-ly zeal your hearts in-spire; Bid rag-ing winds their fu-ry cease, And calm the sav-age breast to peace.

3. And when our la-bors all are o'er, Then shall we part to meet no more; Meet, with the blood-bought throng to fall, And crown our Jesus, Lord of all.

Moderato.

1. Praise, ever-last-ing praise be paid To him who earth's foun - da-tions laid; Praise to the God whose strong deerees, Sway the crea - - - - tion as he please.  
 2. Praise to the goodness of the Lord, Who rules his peo - ple by his word; And there, as strong as his deerees, Reveals his kind - - - est promis - es.

3. Whence then should doubts and fears arise? Why trickling sorrows drown our eyes? Slowly, a - las! the mind receives The comforts that . . . our Maker gives.  
 4. Oh for a strong, a last - ing faith! To ered-it what th' Al-migh - ty saith! T' embrace the message of his Son, And call the joys . . . of heaven our own.

5. Then, should the earth's foundations shake, And all the wheels of na-ture break, Our steady souls shall fear no more Than solid rocks . . . when billows roar.

## BALERN. L. M.

Andante Moderato.

1. Now let my soul, e - ter - nal King! To thee its grateful tribute bring; My knee with humble homage bow; My tongue perform its solemn vow, My tongue perform its solemn vow.  
 2. All na-ture sings thy boundless love, In worlds below, and worlds above; But in thy blessed word I trace, Di - vin - er wonders of thy grace, Di - vin - er wonders of thy grace.

3. There what delight - ful truths I read! There I behold the Saviour bleed; His name salutes my listening ear, Revives my heart, and checks my fear, Revives my heart, and checks my fear.  
 4. There Je - sus bids my sorrows cease, And gives my laboring conscience peace; Raises my grateful passions high, And points to mansions in the sky, And points to mansions in the sky

5. For love like this, oh let my song, Thro' endless years, thy praise prolong; Let distant climes thy name adore, Till time and nature are no more, Till time and na-ture are no more.

## Allegretto Moderato.

1. Long as I live, all-bounteous Lord! My song thy glo-ries shall re-cord; Thy praise, my God, shall fill the strain, While life or be-ing shall re-main.  
 2. Sweet are the thoughts which fill my breast, When on thy various works they rest: God, my Cre-a-tor, lifts my voice: In God, my Saviour, I re-joice!

3. Soon shall his arm his foes dis-may, And sweep the guilty race a-way: And while his church his power adore, The wick-ed sink to rise no more.

 2. As on some lonely building's top, The sparrow tells her moan, Far from the tents of joy and hope, I sit and grieve a - lone, I sit and grieve a - lone.

3. But thou for - ev - er art the same, O my e - ternal God ! Ages to come shall know thy name, And spread thy works abroad, And spread thy works abroad.  
 4. Thou wilt arise, and show thy face, Nor will my Lord delay Beyond th' appoin - ted hour of grace, That long expected day, That long ex - pect - ed day.

5. He hears his saints he knows their ery, And by mysterious ways, Redeems the prisoners, doomed to die, And fills their tongues with praise, And fills, &c.

FULLER. C. M.

\* The work from which we take this piece, attributes it to Bach; we suppose, however, that the harmony parts only are his, the melody being an old German Choral. It is a fine specimen of his harmony, or of his manner of treating this kind of tune in parts.

\* The melody is, in part, a Hindostanee Tune.

Most of the tunes in the previous pages are intended for choir tunes; they are too difficult for congregational or general singing, and require for their proper performance a well trained and efficient choir. But the tunes that follow, are, with few exceptions, congregational tunes. They may be divided as follows: **FIRST CLASS**; in this class are included such tunes as are truly and legitimately congregational, or such as possess those intrinsic qualities or properties which are essential to the highest degree of success in general, or congregational singing. These tunes are designated in the following pages, by the figures 1 and 2. Those marked 1, are most of them among the very best old tunes; they are *within the compass of all classes of voices, easy in melodic progression, and are in one of the oldest, easiest, and most natural rhythmic forms.* This latter circumstance is one that renders them peculiarly appropriate for general use. This rhythmic form, says Rev. Mr. Havergal, in the preface to his admirable collection of "Old Psalmody," is "generically the old form, the *traditional* one, and the only one which all singers feel to be natural." "To make the first and last note of every strain a semibreve, may appear somewhat untheoretical, but the appearance is confined to the music-paper, without any strangeness affecting the ear." "The commencement-notes, may be regarded as in chants, the *ad libitum* precursors of the rest. They may be considered variable in their use; terminal notes are always allowed to be elastic, and why not the initial?"

Mr. Ions, Organist and Director of the Choir of St. Nicholas, Newcastle-on-tyne, says, "In the old psalters, the first and last notes of each strain were always semibreves, or equivalent thereto." "This old notation is earnestly recommended for the reason, that when the first and last notes of each strain are longer than the others, the tune may be sung with considerable spirit without being divested of one particle of its solemnity." In the truth of these remarks, we fully concur. In the rhythmic form here recommended, (the first and last notes of each line being long, and all the others short,) the intermediate notes may receive such a rapidity of utterance as to afford a complete remedy for the heaviness and drawing which has caused the unpopularity or disuse of the old tunes.

The tunes marked 2, are a little more difficult, but still quite easy, so that while we have made a distinction between them and the older rhythmic form, we regard them both as constituting a first class of congregational tunes.

**SECOND CLASS.** This class, (indicated by the figure 3,) includes such as are not genuinely or inherently, but casually, accidentally, or circumstantially suitable for congregational or general use. This is the largest class, for there are but very few real congregational tunes in common use; they are tunes that have become popular as choir tunes, and are thus generally known, and for *this reason*, are now the best tunes for congregational singing. They will continue to be the best until others in genuine congregational style, shall be equally well known and equally well liked; for no tune can be good as a congregational tune, unless it is *well known and well approved*.

Still these tunes (3,) are too difficult for general singing, and though in the use of some of them very satisfactory devotional effects may be realized, yet they never can be as effective, when generally sung, as others less difficult, and possessing all the essential characteristics of the congregational form. For example: the tune St. Martin's, may be now in many places, (because so well known,) one of the best congregational tunes; yet St. Martin's can never be *well sung* by an ordinary congregation. The same may be said of Howard, Barby, All-Saints, Abridge, Mear, and all that class of triple measured tunes. So also the tune Ward, (for the same reason as in the case of St. Martin's,) may be useful as a congregational tune, yet no ordinary congregation *can* (and but very few choirs *do*) sing with accuracy, the syncope in the second and fourth lines, or keep the time in the measures connecting the first and second, and the third and fourth lines. The tunes Duke Street, Medfield, Dedham, Silver-Street, and others of the same general character, can never be sung well congregationally, because of the inequality of the length of notes. The true congregational style is a strictly syllabic union of words with tones, and admits only of notes of two lengths, long and short.

That we may be understood with respect to the time in which the tunes marked 1 should generally be sung, we will add a few words. The Old Hundredth, for example, as usually sung, takes from a minute to a minute and a quarter, and not unfrequently it is so drawn out as to occupy a minute and a half; but when sung in the quicker time which we recommend, and which the long notes at the beginning and end of each line will fully justify without offence to dignity or solemnity, it will take only from forty to fifty seconds. This and other similar tunes should not always be sung with the same degree of quickness; but sometimes slower and sometimes quicker, according to circumstances.

As a further illustration we remark, that the time of the tune Uxbridge is very generally understood, so that whenever it is sung there is not much variation; now we suppose that the short notes in the The Old Hundredth and similar tunes, (that is the intermediate notes between the first and last of each line,) should be sung about as fast as the quarter notes, or shortest notes in Uxbridge. But after all, the old direction is perhaps as good as any, that *the words receive an utterance about as rapid as a due regard to dignity, solemnity, time, place, and circumstances permit; and that an indolent, careless and sluggish manner be carefully avoided.* It will be observed that while there are a few congregational tunes scattered along through the first part of the CANTICA LAUDIS, so there are a few tunes designed exclusively for choirs, in this latter part of the work.

This subject of choir and congregational tunes is one that we recommend to the careful study and practical observation of all who teach, who lead choirs, or who are interested in the progress and true end of sacred song; for neither style of singing can reach any very high point of excellence until it is thoroughly and practically understood.

## THE OLD HUNDREDTH. L. M. 1.

Author Unknown.

Be thou, O God, ex-alt - ed high; And as thy glo-ry fills the sky, So let it be on earth display'd, Till thou art here, as there, o - beyed.

1. The praise of Zi - on waits for thee, Great God, and praise becomes thy house; There shall thy saints thy glory see, And there perform their public vows.

2. O thou, whose mer-cy bends the skies, To save when hum-ble sinners pray; All lands to thee shall lift their eyes, And eve-ry yielding heart o - bey.

3. Soon shall the flock-ing nations run To Zi-on's hill, and own their Lord; The ris-ing and the set-ting sun, Shall see the Saviour's name adored.

## WENTON. L. M. 1.

1. My righteous Judge, my gracious God, Hear, when I spread my hands abroad; I cry for sue-our from thy throne, Oh make thy truth and mercy known.

2. For thee I pray, for thee I mourn; When wilt thou, gracious Lord, return? Shall all my joys on earth re-move? Wilt thou forev-er hide thy love?

3. I lift my hands to thee a - gain, And thirst like parched lands for rain; Oh! let me hear thy gracious voice, So shall my weary soul re-joice.

5. Teach me, Oh Lord, thy ho - ly will, And lead me to thy heavenly hill: Oh let the Spir-it of thy love Con-duct me to thy courts a - bove.

1. My soul, inspired with sacred love, God's ho - ly name for-ev - er bless ; Of all his fa-vors mind-ful prove, And still thy grateful thanks express.

2. The Lord abounds with tender love, And un - ex - ampled acts of grace ; His wakened wrath does slowly move, His will-ing mer-cy flies a - pace.

3. As far as 'tis from east to west, So far has he our sins re-moved, Who, with a fath - er's ten - der breast Has such as fear him always loved.

4. Let eve - ry creature jointly bless The mighty Lord, and thou, my heart, With grateful joy thy thanks express, And in this concert bear thy part.

This tune is called, in old service books, "The Ambrosian Advent Hymn." It is supposed to be one of the oldest church tunes. It is within the compass of all voices, and "young men and maidens, old men and children," may unite in singing it.

BAVA. L. M. (Called also "The Ten Commandments Tune.") 1.

1. Great Sun of Righteousness a - rise ! Oh bless the world with heavenly light ! Thy gospel makes the sim-ple wise, Thy laws are pure, thy judgements right.

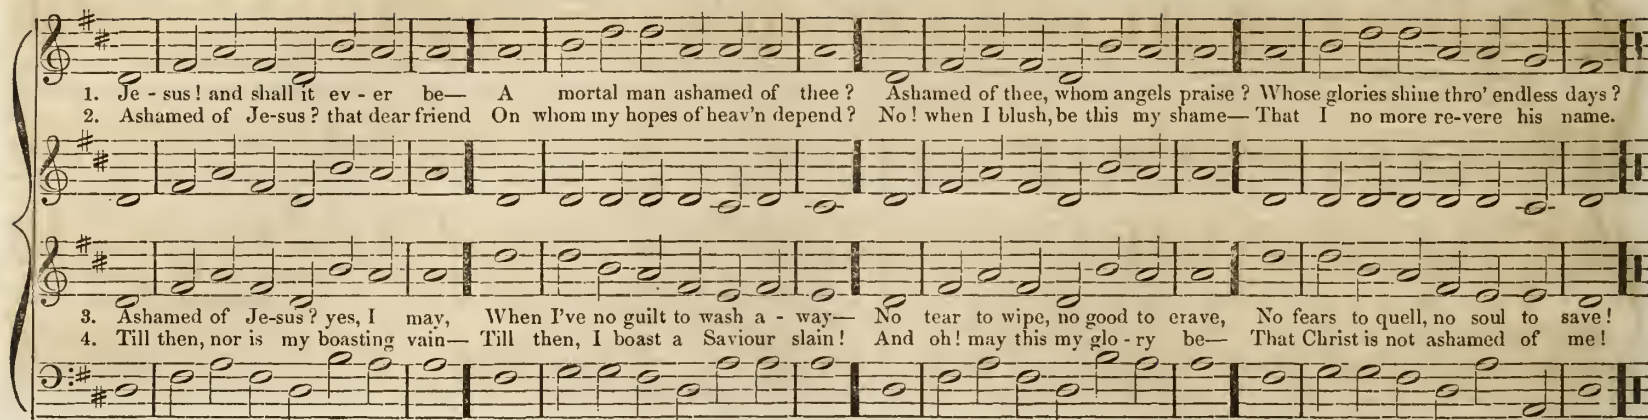

2. Thy no-blest wonders here we view, In souls renewed and sins forgiven : Lord, cleanse my sins, my soul renew, And make thy word my guide to heaven.

1. He, who hath made his refuge God, Shall find a most secure a - bode ; Shall walk all day beneath his shade, And there, at-night, shall rest his head.

2. Now may we say, our God, thy pow'r Shall be our fortress and our tow'r ! We, that are formed of feeble dust, Make thine al-migh-ty arm our trust.

3. Thrice happy man ! thy Maker's care Shall keep thee from the tempter's snare ; God is thy life, his arms are spread, To shield thee with a healthful shade.

This tune is found in the German Psalter of 1562. From its constant publication, in all the olden collections, it may be supposed to have been a special favorite. It is found in Ainsworth's Psalms, and is therefore one of the tunes of the Pilgrims who landed on Plymouth Rock in 1620. It is also much admired by modern scientific musicians. Rink has fugued upon it in his Organ School, and it has been variously arranged, or harmonized by German editors. It is, perhaps, quite equal to "The Old Hundredth" itself, in every thing but recollections and associations

1. Je - sus! and shall it ev - er be— A mortal man ashamed of thee? Ashamed of thee, whom angels praise? Whose glories shine thro' endless days?

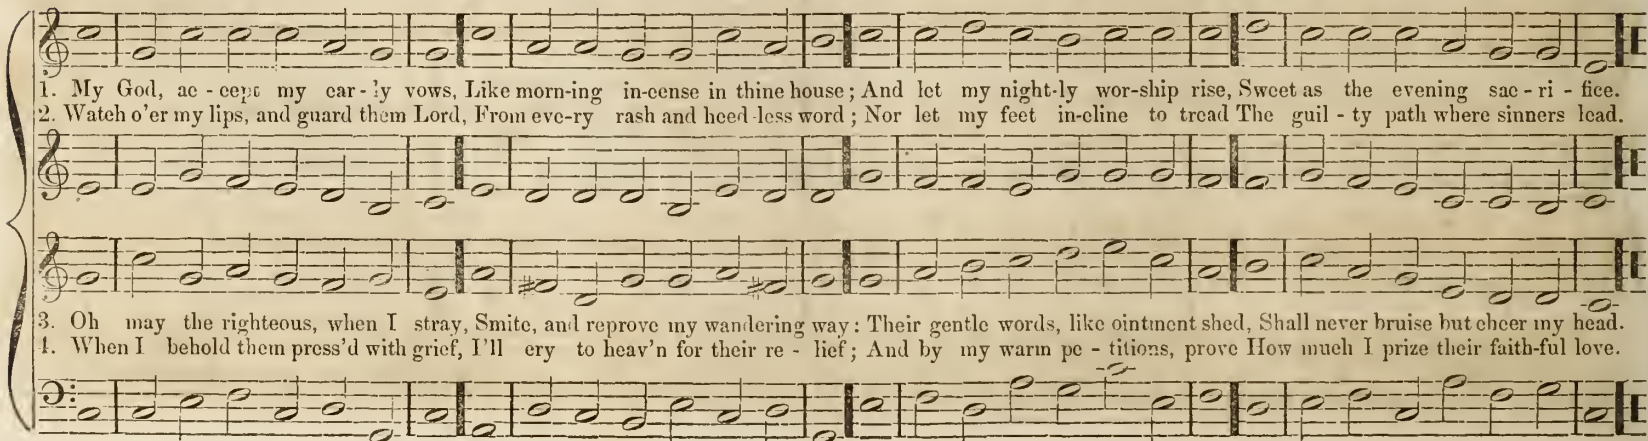

2. Ashamed of Je - sus? that dear friend On whom my hopes of heav'n depend? No! when I blush, be this my shame— That I no more re-vere his name.

3. Ashamed of Je - sus? yes, I may, When I've no guilt to wash a - way— No tear to wipe, no good to crave, No fears to quell, no soul to save!

4. Till then, nor is my boasting vain— Till then, I boast a Saviour slain! And oh! may this my glo - ry be— That Christ is not ashamed of me!

## THORNTON. L. M. 1.

Arranged from a German Choral.

1. My God, ac - cept my car - ly vows, Like morn - ing in - cense in thine house; And let my night - ly wor - ship rise, Sweet as the evening sac - ri - fice.

2. Watch o'er my lips, and guard them Lord, From eve - ry rash and heed - less word; Nor let my feet in - cline to tread The guil - ty path where sinners lead.

3. Oh may the righteous, when I stray, Smite, and reprove my wandering way: Their gentle words, like ointment shed, Shall never bruise but cheer my head.

4. When I behold them press'd with grief, I'll cry to heav'n for their re - lief; And by my warm pe - titions, prove How much I prize their faith - ful love.

1. Bless, O my soul, the liv - ing God, Call home thy tho'ts that rove a - broad ; Let all the pow'rs within me join In work and worship so di - vine.

2. Bless, O my soul, the God of grace, His fa - vors claim thy highest praise : Let not the won - ders he hath wro't Be lost in silence and for - got.

3. 'Tis he, my soul, that sent his Son, To die for crimes which thou hast done ; He owns the ran - som, and for - gives The hour - ly fol - lies of our lives.

WINDHAM. L. M. 2.

DANIEL REED. New-Haven, Ct. 1800.

1. We all O Lord have gone a - stray, And wander'd from thy heav'nly way : The wilds of sin our feet have trod, Far from the paths of thee our God.

2. Hear us, Great Shepherd of thy sheep, Our wand'rings heal, our footsteps keep: We seek thy sheltering fold a - gain, Nor shall we seek thee, Lord, in vain.

3. Teach us to know and love thy way, And grant, to life's re - mot-est day, By thine un - err-ing guidance led, Our will - ing feet thy paths may tread.

\* By the omission of a single dot in the last line, and more simple harmony parts, as in this copy, this very beautiful melody makes an excellent Congregational Tune.

1. God in his earth-ly tem-ple lays Foun-da-tion for his heav'nly praise; He likes the tents of Ja-cob well, But still in Zi-on loves to dwell.

2. His mer-cy vis-its eve-ry house That pay their night and morning vows; But makes a more de-light-ful stay, Where churches meet to praise and pray.

3. What glo-ries were described of old! What wonders are of Zi-on told! Thou ci-t-y of our God be-low, Thy fame shall all the nations know.

## DANFORTH. L. M. DOUBLE. 2.

1. { Sing to the Lord, who loud proclaims His various and his sav-ing names; } 2. Thro' every age his gracious ear Is o-pen to lus servant's prayer;  
 { Oh may they not be heard a-lone, But by our sure ex-perience known. }

Nor can one hum-ble soul complain, That he has sought his God in vain. (To third stanza.)

3. { What un-be-liev-ing heart shall dare In whispers to sug-gest a fear, } 4. To thee our souls in faith a-rise, To thee we lift ex-pect-ing eyes.  
 { While still he owns his aneient name, The same his pow'r, his love the same! }

We bold-ly thro' the desert tread, For God will guard, where God shall lead.

1. My spir - it looks to God a - lone ; My rock and ref-uge is his throne ; In all my fears, in all my straits, My soul for his sal - va - tion waits.  
 2. Trust him, ye saints in all your ways, Pour out your hearts before his face; When helpers fail, and foes in - vade, God is our all-suf - fi - cient aid.

1. God is the ref-uge of his saints, When storms of sharp distress invade : Ere we can of - fer our complaints, Be-hold him present with his aid.  
 2. Loud may the troubled o - cean roar, In sacred peace our souls a - bide, While every nation, eve - ry shore Trembles, and dreads the swelling tide.

3. Zi - on enjoys her monareh's love, Se - cure a-against a threat'ning hour ; Nor can her firm founda - tion move, Built on his truth, and arm'd with power.

\* The first line of this tune is here printed as originally written.

## ROCKINGHAM. L. M. 2.

L. MASON. 1830.

1. Great God, our strength, to thee we cry, Oh let us not for-got-ten lie ; Oppressed with sorrows and with care, To thy pro-tee-tion we re - pair.  
 2. O let thy light at-tend our way, Thy truth afford its steady ray ; To Zi-on's hill di-rect our feet, To wor-ship at thy sa - cred seat.

3. Thy praise, O God, shall tune the lyre, Thy love our joy - ful song in-spire ; To thee our cordial thanks be paid, Our sure defencee, our con-stant aid.  
 4. Why, then, east down, and why distressed? And whence the grief, that fills our breast? In God we'll hope, to God we'll raise Our songs of grat - i - tude and praise.

Ps. 86. 1. Thou great Instruct - er, lest I stray, Oh teach my er - ring feet thy way! Thy truth, with ev - er fresh de - light, Shall guide my doubtful steps a - right.  
 2. How oft my heart's af - fec - tions yield, And wander o'er the world's wide field! My roving pas - sions, Lord, re - claim; U - nite them all to fear thy name.  
 3. Then, to my God, my heart and tongue, With all their powers, shall raise the song; On earth thy glo - ries I'll de - clare, Till heaven th' immortal notes shall hear.

Hymn. { 1. Come, Holy Spir - it, calm each mind, And fit us to ap - proach our God; Re - move each vain, each world - ly thought, And lead us to thy blest a - bode.  
 3. Still brighter faith and hope im - part, And let us now our Sa - viour see; Oh! soothe and cheer each burdened heart, And bid our spir - its rest in thee.

3. O God of hope and peace di - vine, Make thou these sa-cred pleasures mine ; For-give my sins, my fears re - move, And fill my heart with joy and love.

 { My soul shall glo-ry in thy grace, While saints rejoice to hear the song. } 2. Come magni-fy the Lord with me ; Let eve-ry heart ex-alt his name ;

I sought th' eternal God, and he Has not exposed my hope to shame.

## TALLIS. C. M. 1.

THOMAS TALLIS, 1565.

1. Thro' all the chang-ing scenes of life, In trou-ble, and in joy, The prais-es of my God shall still My heart and tongue em-employ.

2. Of his de - liv-erance I will boast, Till all that are dis-tressed, From my ex - am - ple com-fort take, And charm their griefs to rest.

3. Oh ! mag - ni - fy the Lord with me, With me ex - alt his name ; When in dis-tress, to him I called, He to my res-cue came.

4. Fear him, ye saints, and you will then Have nothing else to fear ; Make you his ser - vice your de - light, He'll make your wants his care.

"This is simplicity itself. Both the melody and the harmony are the progeny of our great Cathedralist. He composed them for the Veni Creator, in Archbishop Parker's Psalter. A child may sing the tune, while manly genius will admire it."—HAVERGAL.

1. Long as I live, I'll bless thy name, My King, my God of love, My work and joy shall be the same, In brighter worlds a - bove.  
 2. Great is the Lord, his pow'r unknown, Oh let his praise be great: I'll sing the hon - ors of thy throne, Thy works of grace re - peat.  
 3. Thy grace shall dwell up - on my tongue; And while my lips re - joice, The men who hear my sa - cred song, Shall join their cheerful voice.  
 4. Fa - thers to sons shall tell thy name, And chil - dren learn thy ways; A - ges to come thy truth pro - claim, And na - tions sound thy praise.  
 5. The world is govern'd by thy hand, Thy saints are ruled by love; And thine e - ter - nal king - dom stands, Tho' rocks and hills re - move.

"This," says Rev. Mr. Havergal, "is a deservedly admired tune, and quite in old style. It has been attributed to Dr. Croft, but is probably much older."—RIMBAULT. The cadence at the end of the third line, is, in many books made in G; we have preferred the arrangement found in the old Psalters, and which is also given by Rev. Mr. Havergal in his excellent Manual of Old Psalmody.

## YORK. C. M. 1.

1. Lord, thou wilt hear me when I pray, I am for - ev - er thine: I fear be - fore thee all thee day, Nor would I dare to sin.  
 2. And while I rest my wea - ry head, From care and business free, 'Tis sweet eon - ver - sing on my bed, With my own heart and thee.  
 3. I pay this eve'ning sae - ri - fice, And when my work is done, Great God, my faith, my hope re - lies, Up - on thy grace a - lone.  
 4. Thus, with my tho'tsempo's'd to peace, I'll give mine eyes to sleep; Thy hand in safe - ty keeps my days, And will my slum - bers keep.

"Next to the Old Hundredth, this was once the most popular tune in England. The Scotch call it *SMILT*, and claim it as their own. There are three harmonized versions of it in Ravenscroft; two by John Milton, the father of the poet, and one by Simon Stubbs." It has often been attributed to Milton as its author: but he only "composed it into parts."

1. I love the Lord, he heard my cries, And pit - ied eve - ry groan ; Long as I live, when troubles rise, I'll has - ten to his throne.  
 2. I love the Lord, he bow'd his ear, And chased my grief a - way : Oh let my heart no more de - spair, While I have breath to pray.

3. The Lord be - held me sore dis - tress'd, He bade my pains re - move ; Re - turn, my soul, to God, thy rest, For thou hast known his love.

\* It will probably often be better to sing this tune in D; or E♭.

DUNFERMLINE. C. M. 1.

From Ravenscroft's Psalter, 1621.

1. Whom have we, Lord, in heaven, but thee, And whom on earth be - side ? Where else for sue - cor can we flee, Or in whose strength con - fide ?  
 2. Thou art our por - tion here be - low, Our prom - ised bliss a - bove ; Ne'er may our souls an ob - ject know So pre - cious as thy love.

3. When heart and flesh, O Lord, shall fail, Thou wilt our spir - its cheer ; Sup - port us thro' life's thorn - y vale, And calm each anx - ious fear.  
 4. Yes, thou shalt be our guide thro' life, And help and strength supply ; Sus - tain us in death's fear - ful strife, And wel - come us on high.

To sing the mer - cies of the Lord, My tongue shall nev - er spare, And with my mouth, from age to age, Thy truth I will de - clare.

1. Is there am - bi - tion in my heart? Search, gracious God, and see; Or do I act a haugh-ty part? Lord, I ap - peal to thee.  
 2. Whate'er thine all dis-cern-ing eye Sees for thy crea-ture fit, I'll bless the good, and to the ill Con - tent - ed - ly sub - mit.

3. Let not de-spair nor fell re - venge Be to my bo - som known; O give me tears for oth - ers' wo, And pa-tience for my own.  
 4. Feed me, O Lord, with needful food: I ask not wealth or fame; But give me eyes to view thy works, A heart to praise thy name.

The name of this tune in the old books is *French*. The Dundee of Scotland is the same as the Windsor of most of the English and American books of Psalmody.

## WINDSOR. C. M. 1.

From the "Scotch Psalter," 1615.

1. O God, our help in a - ges past, Our hope for years to come, Our shel-ter from the storm-y blast, And our e - ter - nal home;  
 2. Be - neath the shad-ow of thy throne, Thy saints have dwelt se - cure; Suf - fi - cient is thine arm a - lone, And our de-fence is sure.

3. Be - fore the hills in or - der stood, Or earth received her frame; From ev - er - last - ing thou art God, To end-less years the same.  
 4. Thy word commands our flesh to dust, "Re - turn, ye sons of men;" All na-tions rose from earth at first, And turn to earth a - - gain.  
 5. O God, our help in a - ges past, Our hope for years to come, Be thou our guard, while troubles last, And our e - ter - nal home.

Dundee is the old name of this tune. The Scotch claim it as a national tune. Burns has reference to it in the line, "Perhaps DUNDEE's wild warbling measures rise;" and another poet has said of it, "Could I, when being carried to my grave, wake up just to hear what tune would be sung at it, I should like it to be Dundee; or, as we call it, Windsor."

The Lord is on - ly my sup - port, And he that doth me feed; How can I then lack an - y - thing Where-of I stand in need.

1. To heaven I lift my wait - ing eyes, There all my hopes are laid; The Lord, who built the earth and skies, Is my per - pet - ual aid.  
 2. Their stead - fast feet shall nev - er fall, Whom he de - signs to keep; His ear at - tends their hum - ble call, His eyes can nev - er sleep.

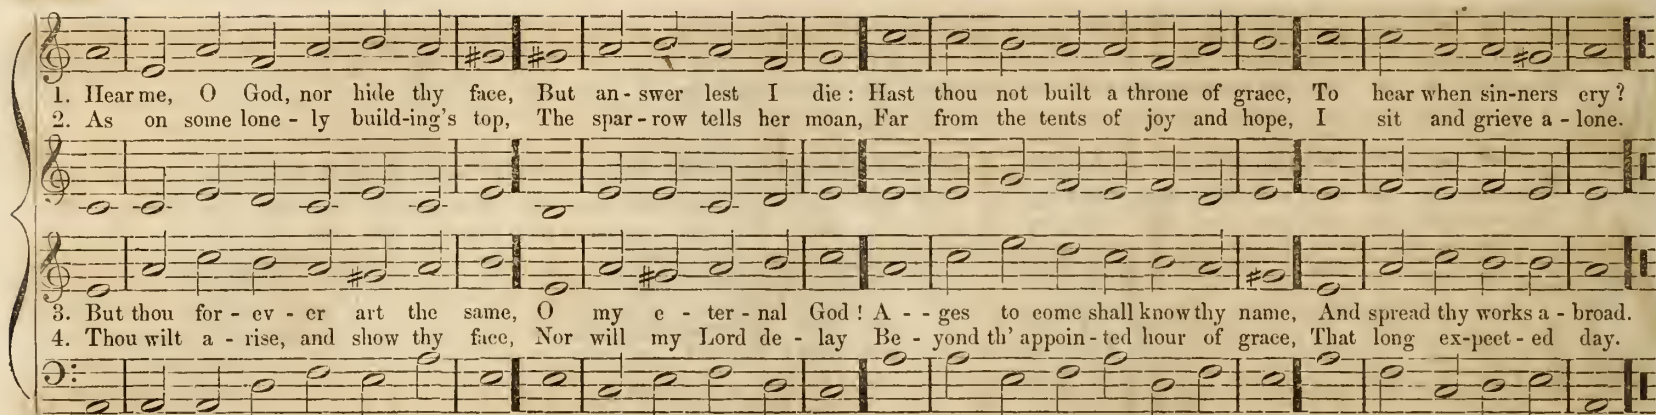

3. Is - rael, re - joice, and rest se - cure; Thy keep - er is the Lord; His wake - ful eyes em - ploy his power For thine e - ter - nal guard.  
 4. He guards thy soul, he keeps thy breath, Where thickest dan - gers come; Go and re - turn, se - cure from death, Till God shall call thee home.

MARTYRS. C. M. 1. "Or plaintive *Martyrs* worthy of the name." BURNS.

1. Be - hold us, Lord, with hum - ble fear Ap - proach thy tem - ple gate; Though most unwor - thy to draw near, Or in thy courts to wait.  
 2. But, trust - ing in thy boun - dless grace, To all so free - ly given, We wor - ship in thy ho - ly place, And lift our souls to heaven.

3. Lead us in all thy right - eous ways, Nor let our foot - steps slide: Make straight thy path before our face, Our guar - dian, still, and guide.  
 4. No more to sin, Lord, let us yield, De - fend - ed from a - bove, And kept, and cov - ered with the shield Of thy al - migh - ty love.

This favorite old tune is often printed in triple measure; if any one prefers that rhythmic form, he has but to make every other note, or those marked *l*, long, and all the others short. The rhythmic form in which the tune is here presented is, as we think, much the best.

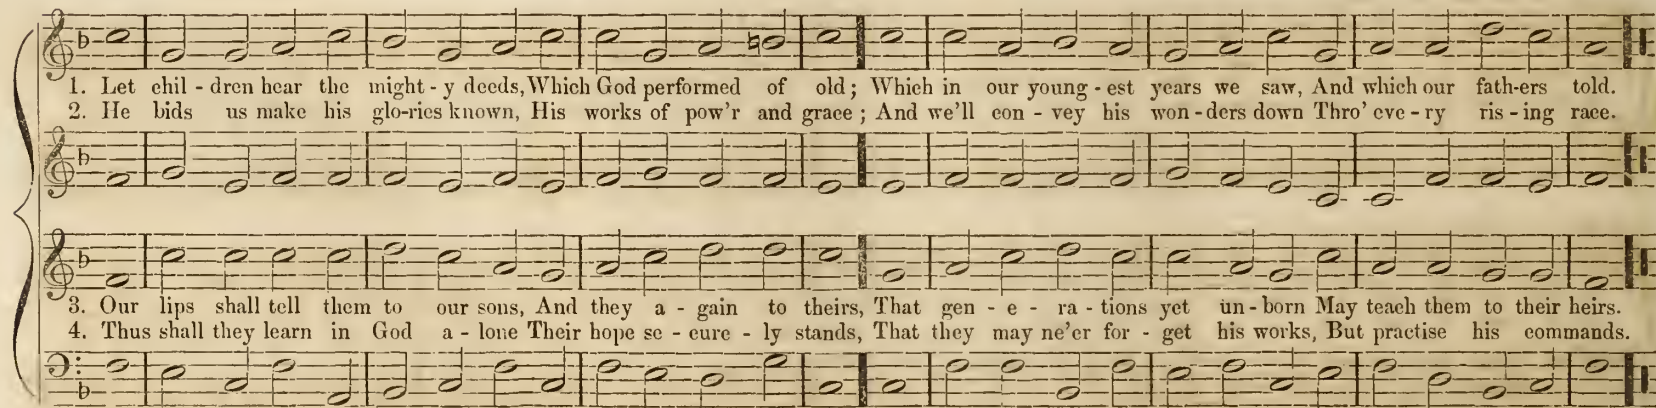

1. Hear me, O God, nor hide thy face, But an-swer lest I die: Hast thou not built a throne of grace, To hear when sin-ners cry?  
 2. As on some lone-ly build-ing's top, The spar-row tells her moan, Far from the tents of joy and hope, I sit and grieve a-lone.

3. But thou for-ev-er art the same, O my e-ter-nal God! A-ges to come shall know thy name, And spread thy works a-broad.  
 4. Thou wilt a-rise, and show thy face, Nor will my Lord de-lay Be-yond th'appoin-ted hour of grace, That long ex-pect-ed day.

This very beautiful melody is, as we suppose, one of the oldest Scotch Tunes.

## LUTZEN. C. M. 1.

N. HERRMANN. 1561.

1. Let chil-dren hear the might-y deeds, Which God performed of old; Which in our young-est years we saw, And which our fath-ers told.  
 2. He bids us make his glo-ries known, His works of pow'r and grace; And we'll con-vey his won-ders down Thro' eve-ry ris-ing race.

3. Our lips shall tell them to our sons, And they a-gain to theirs, That gen-e-ra-tions yet un-born May teach them to their heirs.  
 4. Thus shall they learn in God a-lone Their hope se-cure-ly stands, That they may ne'er for-get his works, But practise his commands.

This is one of the very best German Chorals; in some books it is attributed to Luther; but it more frequently appears in connection with the name of Herrmann, and it is not found in the German edition of Luther's sacred songs.

Lord, send thy light to guide my feet, And bid thy truth ap - pear; Con - duct me to thy ho - ly hill, To taste thy mer - cies there.

*Ps. 119.*

1. To thee, be - fore the dawn - ing light, My gra - cious God, I pray; I med - i - tate thy name by night, And keep thy law by day.  
 2. My spir - it faints to see thy grace, Thy prom - ise bears me up; And while sal - va - tion long de - lays, Thy word sup - ports my hope.  
 3. When midnight dark - ness veils the skies, I call thy works to mind; My thoughts in warm de - vo - tion rise, And sweet ac - cept - ance find.

\* A tune very generally used, easily sung, and always good.

## DOWNS. C. M. 2.

## ARLINGTON. C. M.\* 1.

DR. ARNE.

4. There shall I bathe my wea-ry soul, In seas of heavenly rest; And not a wave of trouble roll, Across my peaceful breast.

\* This has long been a popular tune. In singing it congregationally (for which it is not well adapted,) care should be taken on the part of the choir not to hurry the time. They must yield a little, too, in regard to time, in all those measures having a dotted quarter and an eighth note together.

1. Ye wretched, hun-gry, starv-ing poor; Be-hold a roy-al feast! Where mer-cy spreads her boun-teous store, For eve-ry hum-ble guest.  
 2. There Je-sus stands with o-pen arms; He calls, he bids you come: Tho' guilt re-strains, and fear a-larms, Be-hold there yet is room.

3. Oh! come, and with his chil-dren taste The bless-ings of his love; While hope ex-pects the sweet re-past Of no-bler joys a-bove.  
 4. There, with u-nit-ed heart and voice, Be-fore th'e-ter-nal throne, Ten thousand, thou sand souls re-joice, In songs on earth un-known.

5. And yet ten thou-sand, thousand more Are wel-come still to come: Ye long-ing souls, the grace a-dore, And en-ter while there's room.

## DEDHAM. C. M. 3.

WM. GARDINER, Author of the 'Music of Nature.'

 2. Let not thy face be hid from me, Nor frown my soul a-way: God of my life, I fly to thee In each dis-tress-ing day.

3. Should friends and kindred, near and dear, Leave me to want, or die; My God will make my life his care, And all my need sup-ply.

At the beginning of the 2d, 3d and 4th lines, the time must yield a little when all the people sing.

1. Oh 'twas a joy - ful sound to hear Our tribes de-vout-ly say, 'Up, Is-rael, to the tem-ple haste, And keep your fes-tal day!  
 2. At Sa-lem's courts we must ap-pear, With our as-sembled pow'rs, In strong and beau-teous or-derrang'd, Like her u-ni-ted tow'rs.

3. Oh, pray we then for Sa-lem's peace. For they shall prosperous be, Thou ho-ly ci-t-y of our God, Who bear true love to thee.  
 4. May peace with-in thy sa-cred walls A con-stant guest be found, With plen-ty and pros-per-i-ty Thy pal-a-ces be crown'd.

1  
Let all the earth their voices raise,  
To sing a psalm of lofty praise,  
To sing and bless Jehovah's name ;  
His glory let the heathen know,  
His wonders to the nations show,  
And all his saving works proclaim.

2  
Oh ! haste the day, the glorious hour,  
When earth shall feel his saving power,  
And barbarous nations fear his name :  
Then shall the race of man confess  
The beauty of his holiness,  
And in his courts his grace proclaim.

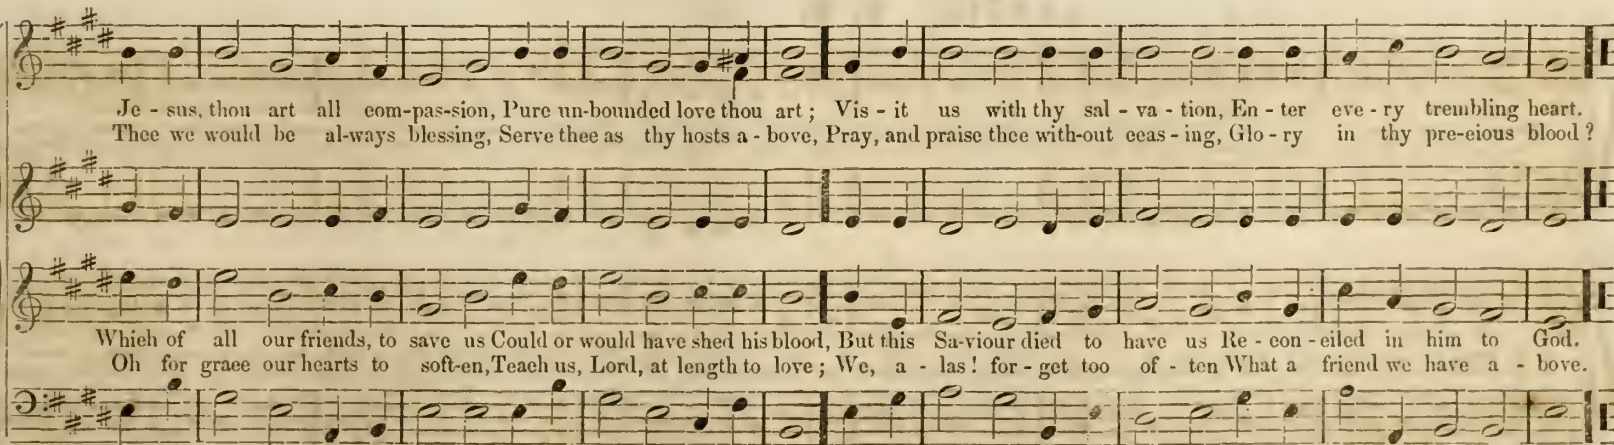

ly. 1. 1. Love di-vine all love ex-cel-ling, Joy of heav'n to earth come down: Fix in us thy hum-ble dwell-ing, All thy faith-ful mer-cies crown:  
2. Come almight-y to de-liv-er, Let us all thy life re-ceive! Sudden-ly re-turn and nev-er, Nev-er more thy tem-ples leave!

Thee we would be al-ways blessing, Serve thee as thy hosts a-bove, Pray, and praise thee with-out ceas-ing, Glo-ry in thy pre-cious blood?

Which of all our friends, to save us Could or would have shed his blood, But this Sa-viour died to have us Re-con-ciled in him to God.  
Oh for graee our hearts to soft-en, Teach us, Lord, at length to love; We, a-las! for-get too of-ten What a friend we have a-bove.

## EXPLANATIONS AND DIRECTIONS.

In *chanting* be careful of these two things; the *delivery of the tone*, and the *utterance of the words*: or, of the use of the *vocal organs*, and of the *articulating organs*.

The tone should be carefully produced, and carefully sustained. As a general thing, it should be continuous, without break, or interruption. In connection with the tone, the words should be pronounced with as much distinctness as is possible, so that one may not only know what he says himself, but be understood also by others.

The words uttered in connection with the *Chanting notes* should not be hurried, but time should be taken, as in declamation, for a deliberate, dignified, and appropriate utterance.

The words uttered in connection with the *Cadences* should not be prolonged or drawled; but the same speed of utterance should be kept up, as nearly as circumstances will permit, throughout the chant.

Let the delivery of the voice, and the utterance of the words, approximate more to the declamatory or speaking manner, than to the *cantabile*, or singing style. The latter does not properly belong to chanting. Do not omit, or clip, or run together, the little words, or syllables, but speak each one clearly and distinctly.

If a psalm, containing an unequal number of verses, is sung to a double chant, the latter half of the chant should be repeated for the last verse.

It is recommended that the first part of the *GLORIA PATRI*, be sung in unison, resuming the harmony parts at the words "As it was in the beginning."

The bars in the *psalms* correspond to the bars in the *chants*.

The dash (—) signifies that the word is to be continued.

Dots (· ·) show the application of the words to the notes when more than two syllables occur in the same measure.

The organ accompaniment in chanting should be, in general, after the most *legato* manner. The organist should be watchful of the words, and move carefully with the singers. It is not an easy thing to accompany a chant or a metrical tune well, and we want for both purposes, such organists as Rev. Mr. Havergal describes, "*organists who have*" not only fingers, but "*souls*."

All thy works a - - round thee stood,	And thine eye be-held them	good,	While they sang with sweet ac - cord,	Ho - ly,	ho - ly,	ho - ly	Lord.	
Lightly by the . . . . . world es - teen'd,	From that world by thee re - deemed,	Sing we here with . . . glad	ac - cord,	Ho - ly,	ho - ly,	ho - ly	Lord.	
There shall saints and ser - a - phim,	Harp and voices, swell one	hymn,	Blending in sub - lime	ac - cord,	Ho - ly,	ho - ly,	ho - ly	Lord.

## HUMBLE DEVOTION.

1. From the recesses of a lowly spirit,  
My humble prayer ascends, O | Father, | hear it!  
Borne on the trembling wings of fear and | meekness :.. For- | give its |  
weakness.
2. I know, I feel how mean, and how unworthy  
The lowly sacrifice I | pour be- | fore thee :  
What can I offer thee, O thou most | holy ! .. But | sin and | folly.
3. Lord, in thy sight, who every bosom viewest,  
Cold in our warmest vows, and | vain our | truest ;  
Thoughts of a hurrying hour, our lips re- | peat them, .. Our | hearts for- |  
get them.
4. We see thy hand, it leads us, it supports us :  
We hear thy voice, it | counsels .. and it | courts us ;  
And then we turn away ! and still thy | kindness .. For- | gives our |  
blindness !
5. Who can resist thy gentle call, appealing  
To ev'ry gen'rous thought and | grateful | feeling !  
Oh ! who can hear the accents of thy | mercy .. And | never | love thee.
6. Kind Benefactor ! plant within this bosom  
The | seeds of | holiness, || and let them blossom  
In fragrance, and in beauty bright and | vernal, .. And | spring e- | ternal.
7. Then place them in those everlasting gardens,  
Where angels walk, and | seraphs .. are the | wardens ;  
Where every flower, brought safe through death's dark | portal .. Be- | comes  
im- | mortal.

## "THY WILL BE DONE."

1. "Thy will be | done!" || In devious way  
The hurrying stream of | life may | run ; ||  
Yet still our grateful hearts shall say,  
"Thy— | will be | done."
2. "Thy will be | done!" || If o'er us shine  
A gladd'ning and a | prosp'rous | sun, ||  
This prayer will make it more divine,  
"Thy— | will be | done."
3. "Thy will be done !" || Though shrouded o'er  
Our | path with | gloom, || one comfort, one  
Is ours : to breathe, while we adore,  
"Thy— | will be | done."
